Frequently Asked QuestionsOur support team searches for useful product information and answers to frequently asked questions. If you find an inaccuracy in our frequently asked questions, please let us know by using our contact form. With most freezers a higher setting means the machine will cool harder. With a lower setting, the machine will cool less hard and the temperature in the freezer will be higher. This was helpful (2033) Read more For optimal use of the freezer it is best to defrost it once every 3-6 months. Ice on the inside of the freezer reduces the available space and increases the use of energy. The thawing process can be accelerated by placing hot water in the drawer or placing bowls of hot water in the freezer. This was helpful (968) Read more Freezers that have NoFrost technology can keep the air in the freezer dry, resulting in less ice forming inside. This was helpful (841) Read more No, the freezer needs to stand in an upright position for at least 4 hours before it can be turned on. This is because the coolant liquid needs to settle. This was helpful (746) Read more Preferably not. The temperature in your freezer will rise, which negatively impacts the other items that are stored inside. This was helpful (680) Read more The stars indicate the freezing capacity. 1 star indicates a freezing capacity down to -6C. This makes the freezer suitable for making ice cubes or storing previously frozen goods for up to two weeks. Fresh food cannot be frozen. 2 stars indicates a freezing capacity down to -12C. This makes the freezer suitable for storing previously frozen goods for up to two months. Fresh food cannot be frozen. 3 stars indicates a freezing capacity down to -18C. This makes the freezer suitable for storing previously frozen goods for up to two months. Fresh food cannot be frozen. 4 stars indicates a freezing capacity down to -24C. This makes the freezer suitable for storing previously frozen goods for up to two months. Fresh food cannot be frozen. 5 stars indicates a freezing capacity down to -30C. This makes the freezer suitable for storing previously frozen goods for up to two months. Fresh food cannot be frozen. This depends on the size, age and model of the freezer. It may take several hours to 24 hours for the freezer to reach the set temperature. The process can be accelerated by placing non-perishable goods in the freezer. This was helpful (675) Read more Yes, nearly all standing freezers offer the option to place the door on the other side. How to do this can generally be found in the manual. This was helpful (659) Read more To ensure a good ventilation it's best to leave at least 5cm of free space on both sides and the back of the freezer. This was helpful (421) Read more The two most common causes are that the freezer is not level and that the door seal is damaged or has food remains on it. Make sure the freezer is level and check the door seal. Replace the seal if necessary. This was helpful (381) Read more The rubber seals are not actually inside the freezer and are therefore warmer. This allows bacteria to grow and mold to form. Clean the rubbers regularly to prevent this. This was helpful (229) Read more R-410A is a cooling agent that is used in appliances that cool up to 0C, like refrigerators and air conditioners. It is the replacement of older cooling agents and does not damage the ozone layer.
