PDFFiller is an online PDF form filler and editor that has been on the market since 2006. It allows you to not only fill out PDF documents, sign them and send them out but also to host them on your own website complete with the ability for people to do the same. Today, I'm going to share with you my PDFFiller Review. I first came across PDFFiller when they reached out to me to ask if I was interested in taking a look at their software. Being a long time Docusign user, I was eager to check out an alternative and see if it met my needs. I'm glad I did. PDFFiller is significantly easier to use and felt far faster in my time using the software. For the purposes of this PDFFiller review, I've used a W8 form from the IRS (something I often have to fill out being Canadian and working with US companies). When you first log into PDFFiller, you'll be greeted with this screen: To add a document, simply click on the Add New Form button. Now upload your document to PDFFiller and it will instantly be available for you to fill out. Now that you've uploaded your PDF document, just click in the fields and fill out the information required. It's as easy as clicking and typing. Once you've filled out the form, it's time to move to the signature stage. Adding a signature is incredibly easy, you can type one out, draw it with your mouse, use a touch screen device (if you have one), capture a signature or upload one. In my case, I chose to draw one with my mouse, which I find is as close as I can get to real life. In this instance, I'm using a fake name so I'll just sign the document as "Joe". That's all there is to the signing and filling out process. Pretty simply isn't it? Let's take a quick look at a few other slick features you get with PDFFiller. Adding a watermark to documents is always handy and doing so simply requires you clicking on the watermark tab on the right side of the screen and creating yours. This is incredibly handy for those of us who want to show people how a form should be completed but don't want it to be re-used somewhere else. Adding in a SAMPLE or VOID watermark is useful. Adding even more features, PDFFiller also allows you to spell check your document. Of course, it can only spell check the information you've typed and that's a great feature to make sure you haven't made any mistakes on your form. To enable it, simply flick the switch as shown below. Once you've finished with your document, it's time to send it off. You have a slew of options such as printing it, saving it as Word or PDF, emailing, faxing, SMS and more. There you have it, as you can see, it's a very easy to use piece of software and incredibly handy for busy professionals who don't have printers with them on the road. Last but not least, they have one feature I can see people using on their websites that is incredibly handy, the ability to share a document that can be filled out and signed by visitors to your website. Check out the video below to see how it works: Simply sign up for an account with PDFFiller and you'll be well on your way to signing contracts, PDFs and more. They also have handy iOS and Android apps that are just as easy to use. Dubbed the "Goddess of Pop", she gained fame in 1965 as part of the folk duo Sonny & Cher, early exponents of 1960s counterculture. She became a TV star in the 1970s, with The Sonny & Cher Comedy Hour drawing more than 30 million viewers weekly, and topped the Billboard Hot 100 with narrative pop songs including "Gypsys, Tramps & Thieves" and "Half-Breed". Transitioning to film, she earned two Academy Awards nominations—for Silkwood (1983) and Moonstruck (1987), winning Best Actress for the latter—and received the Cannes Film Festival Award for Best Actress for Mask (1985). Her dance-pop comeback album Believe (1998) introduced the "Cher effect", a stylized use of Auto-Tune to distort vocals. Her 2002–2005 Farewell Tour grossed $250 million, the highest ever by a female artist at the time. A Rock and Roll Hall of Fame inductee, Cher is the only solo artist with Billboard number-one singles in each of seven decades. (Full article...) An opponent of the military dictatorships of the 1970s and 1980s, Aguirre was an early activist in the country's human rights movement. Exiled to Ecuador by the regime of Luis García Meza, she collaborated with Leonidas Proaño's indigenous ministry and worked closely with the country's peasant and social organizations. Blinded in both eyes by toxoplasmosis, Aguirre took up the cause of disability rights, joining the Departmental Council for Disabled Persons upon her return to Bolivia. In 2009, she joined the Movement for Socialism and was elected to represent the department of Tarija in the Chamber of Senators, becoming the first blind person in Bolivian history to assume a parliamentary seat. At the time, it was known as the Year of the Consulship of Proculus and Paulinus (or, less frequently, year 1078 Ab urbe condita). The denomination 325 for this year has been used since the early medieval period, when the Anno Domini calendar era became the prevalent method in Europe for naming years. German and Sarmatian campaigns of Constantine: Emperor Constantine I personally assures the security of the Danube frontier by defeating the Goths, the Vandals and the Sarmatians. Constantine has deposed Emperors Licinius and Martinian executed in Thessalonica and Cappadocia respectively for conspiring and raising troops against him.[1] Constantine forbids criminals being forced to fight to the death as gladiators.[2] April 1 – Crown Prince Cheng of Jin, age 4, succeeds his father Ming of Jin as emperor of the Eastern Jin dynasty. During his reign, he is largely advised by regents, his uncle Yu Liang and high-level officials. The Colossus of Constantine in the Basilica of Maxentius and Constantine, Rome, is perhaps remodelled at about this date.[3] (The remains are moved to the Palazzo dei Conservatori, Rome, in the 15th century). May 20 – First Council of Nicaea: Constantine summons an ecumenical council of bishops in Nicaea (Turkey). Map of the world in AD 250. Eastern Hemisphere at the end of the 3rd century AD. The 3rd century was the period from AD 201 (represented by the Roman numerals CCI) to AD 300 (CCC) in accordance with the Julian calendar. In this century, the Roman Empire saw a crisis, starting with the assassination of the Roman Emperor Severus Alexander in 235, plunging the empire into a period of economic troubles, barbarian incursions, political upheavals, civil wars, and the split of the Roman Empire through the Gallic Empire in the west and the Palmyrene Empire in the east, which all together threatened to destroy the Roman Empire in its entirety, but the reconquests of the seceded territories by Emperor Aurelian and the stabilization period under Emperor Diocletian due to the administrative strengthening of the empire caused an end to the crisis by 284. This crisis would also mark the beginning of Late Antiquity. While in North Africa, Roman rule continued with growing Christian influence, particularly in the region of Carthage. In Persia, the Parthian Empire was succeeded by the Sassanid Empire in 224 after Ardashir I defeated and killed Artabanus V during the Battle of Hormozdgan. The Sassanids then went on to subjugate many of the western portions of the declining Kushan Empire. In Africa the most significant event was the rise of the Aksumite Empire in what is now Ethiopia, which experienced significant military expansion and became a major trading hub in northeast Africa.[1] In China, the chaos that had been raging since 189 would ultimately continue to persist with the decisive defeat of Cao Cao at the Battle of Red Cliffs in 208, which would increasingly end the hopes of unification and lead to the tripartite division of China into three main empires; Shu, Wu, and Wei, colloquially known as the Three Kingdoms period, which started in 220 with the formal abdication of Emperor Xian of Han to Cao Cao's son, Cao Pi, thereby founding Wei, which would go on to conquer Shu in 263, but would ultimately be united again under the Jin dynasty, headed by the Sima clan, who would usurp Wei in 266, and conquer Wu in 280. In other parts of the world, Korea was ruled by the Three Kingdoms of Korea, Japan entered the Kofun period and the Southeast Asian mainland was mostly dominated by Funan, the first kingdom of the Khmer people. In India, the Gupta Empire was on the rise towards the end of the century. In Pre-Columbian America, the Adena culture of the Ohio River valley declined in favor of the Hopewell culture. The Maya civilization entered its Classic Era. After the death of Commodus in the late previous century the Roman Empire was plunged into a civil war. When the dust settled, Septimius Severus emerged as emperor, establishing the Severan dynasty. Unlike previous emperors, he openly used the army to back his authority, and paid them well to do so. The regime he created is known as the Military Monarchy as a result. The system fell apart in the 230s, giving way to a fifty-year period known as the Military Anarchy or the Crisis of the Third Century, following the assassination of the 28-year-old emperor Severus Alexander (the last emperor of the Severan dynasty), where no fewer than twenty emperors held the reins of power, most for only a few months. The majority of these men were assassinated, or killed in battle, and the empire almost collapsed under the weight of the political upheaval, as well as the growing Persian threat in the east. Under its new Sassanid rulers, Persia had grown into a rival superpower, and the Romans would have to make drastic reforms in order to better prepare their state for a confrontation. These reforms were finally realized late in the century under the reign of Diocletian, one of them being to divide the empire into an eastern and western half, and have a separate ruler for each.
