Create a free jazz poster Featured Design Template Categories Born in America, jazz can be seen as a reflection of the cultural diversity and individualism of this country. At its core are an openness to all influences and personal expression through improvisation. Throughout its history, jazz has straddled the worlds of popular music and art music, and it has expanded to a point where its styles are so varied that one artist may sound completely unrelated to another. First performed in bars, jazz can now be heard in clubs, concert halls, universities, and large festivals all over the world. New Orleans, Louisiana, around the turn of the 20th century was a melting pot of cultures. A major port city, people from all over the world come together there, and as a result, musicians are exposed to a variety of music. European classical music, American blues, and South American songs and rhythms came together to form what became known as jazz. The origin of the word jazz is widely disputed, although it is thought to have originally been a sexual term. One thing that distinguishes jazz music is its focus on improvisation. Louis Armstrong, a trumpet player from New Orleans and then Chicago, is considered the father of modern jazz improvisation. His trumpet solos were melodic and playful and filled with energy that could only result from being composed on the spot. A leader of several groups in the 1920s and 30s, Armstrong inspired countless others to make the music their own by developing a personal style of improvisation. Thanks to early records, the music of Armstrong and others in New Orleans could reach a broad radio audience. The music's popularity began to increase as did its sophistication, and major cultural centers around the country began to feature jazz bands. Chicago, Kansas City, and New York had the most thriving music scenes in the 1940s, where dance halls were filled with fans that came to see large jazz ensembles. This period is known as the swing era, referring to the liting "swing" dance rhythms employed by the Big Bands. Benny Goodman popularized the music for white audiences. Other influential bandleaders were Cab Calloway and Count Basie. One of the greatest jazz vocalists of the 1930s to the 1950s, Billie "Lady Day" Holiday could wrench enormous emotion out of any word in a jazz tune. She made her first recordings with Benny Goodman but found wider fame with Count Basie's orchestra. Influential bandleader, composer of American standards, and pianist Duke Ellington was a pioneer in the Big Band era, and his band lasted for more than 50 years, based out of New York, though they toured worldwide. He is widely renowned as America's greatest composer. His career started in the 1920s and extended into the 1970s. Big Bands gave musicians the opportunity to experiment with different approaches to improvisation. While members of a Big Band, saxophonist Charlie Parker and trumpeter Dizzy Gillespie began to develop a highly virtuosic and harmonically advanced style known as "bebop," an onomatopoeic reference to the rhythmic punches heard in the music. Parker and Gillespie performed their music in small ensembles all over the country, and musicians flocked to hear the new direction jazz was taking. The intellectual approach and technical facility of these pioneers of bebop set the standard for today's jazz musicians. Other bebop influencers include Thelonious Monk and Max Roach. One of jazz's most popular singers for 50 years was Ella Fitzgerald, who sold 40 million records in her lifetime and toured the nation widely, leading her own band. She started her career during the Big Band era but adapted to bebop and other styles, becoming a pioneer in scat singing. In 1944, Miles Davis joined Charlie Parker's band (his idol), but it wasn't long before his experimentation and improvisation led him to front his own projects. (See "Kind of Blue," the biggest-selling jazz album of all time.) His 1960s quintet, which included John Coltrane, is lauded as one of the most influential in jazz—and this was even before he recorded "Bitches Brew." He's the most influential jazz artist of the second half of the 20th century, due to his constant reinvention of himself and jazz music. Jazz is a highly developed art form that continues to evolve and expand in numerous directions. The music of each decade sounds fresh and distinct from the music that preceded it. Since the days of bebop, the jazz scene has included avant-garde music (Sun Ra, Charles Mingus, Eric Dolphy, Ornette Coleman), Latin jazz (Tito Puente, Stan Getz, Cal Tjader, Mongo Santamaria, Poncho Sanchez) jazz/rock fusion (Herbie Hancock, Chick Corea, Freddie Hubbard), and countless other styles. Jazz today is so diverse and broad that there is something interesting to find in every artist's style. The museum's world class collections help tell the complex history of our nation. Donate Today Cover of Scott Joplin's "The Ragtime Dance" Classic rag (short for classical ragtime) is the style of ragtime composition pioneered by Scott Joplin and the Missouri school of ragtime composers. These compositions were first considered "classic" by Joplin's publisher, John Stark, as a way to distinguish them from what he considered the "common" rags of other publishers. Today, any composition fitting this particular ragtime structural form is considered classic rag. In the earliest days of ragtime, there was little consensus on how to print the syncopated melodies of ragtime, so there was considerable variety in the formatting of sheet music. Pieces appeared in common meter, in 4/4 time, and in 2/4 time, and often followed conventions of earlier musical forms such as the march. As the 20th century dawned, most composers, arrangers, and publishers began to settle on a common set of notational and structural conventions, and because Scott Joplin was the best-selling ragtime composer in that era, his conventions eventually predominated. The "classic rag" form can thus be considered a typical form of a ragtime piano composition, though it is by no means the only form.[citation needed] In idealized form, the classic rag has the following structure: It is set in 2/4 time. It starts with a four-bar introduction. It continues with a pair of 16-bar themes, in the following sequence: An initial theme (or A strain). A repeat of the A strain. A second theme (or B strain). A repeat of the B strain. A restatement of the A strain. It concludes with a pair of 16-bar themes in the subdominant key (the key with one additional flat, or one less sharp), commonly called the trio, in the following sequence: A third theme (or C strain). A repeat of the C strain. A fourth theme (or D strain). A repeat of the D strain. This can be written more succinctly as: INTRO AA BB A CC DD. Few classic rags follow this idealized form, which is only a generalization; there are a number of standard variations: The introduction may be longer or shorter than four bars, or may be omitted altogether. The C and D strains may continue in the original key rather than use the subdominant key. The D strain may return to the original key rather than stay in the subdominant key. The D strain may be omitted altogether, or replaced with a restatement of the A or B strain. Some repetitions of strains may be omitted, usually one of the repeats of the A strain. Brief transitional phrases may be inserted between strains. In the later years of ragtime, under the influence of Tin Pan Alley, a shorter three-strain form (omitting the D strain) became common. Rag strains themselves have considerable structure. The treble clef (played by the right hand) typically contains the syncopated melodic theme, while the bass clef (the left-hand part) grounds this theme rhythmically with a regular, alternating pattern of eighth-notes (a walking bass). The sixteen-bar strain is often structurally divided into 4 four-bar phrases, the third phrase repeating the first. There is considerable variation, though. Some composers (such as James Scott) made frequent use of two-bar phrases and others (such as Joseph Lamb) tended to employ eight-bar phrases. Jason, David A., Tichenor, Trebor J. (1978).
