Then, click "Attach comment to this post" to move it. 1 Comment Changing your Armitron watch from military time (24-hour format) to standard 12-hour format is generally straightforward, involving accessing the watchs settings menu and toggling the display mode. This guide provides a step-by-step process and answers common questions to help you customize your Armitron watch to your preferred time display.Understanding Armitron Watch BasicsBefore diving into the specific steps, its helpful to understand the basic components and functionality common across most Armitron digital watches. Armitron offers a wide range of digital and analog watches, but the method for changing the time format primarily applies to their digital models. These watches typically feature several buttons, often labeled with terms like Mode, Set, Start/Stop, and Light. The functions of these buttons can vary slightly depending on the specific model, so consulting your watchs user manual is always recommended as the ultimate source of truth. Is this article helpful to you? Step-by-Step Instructions for Changing the Time FormatWhile specific button labels might differ, the general process for changing the time format from 24-hour to 12-hour usually involves the following steps:Enter Setting Mode: Press the Mode button repeatedly until you reach the timekeeping display. This is usually the default display screen.Access the Time Setting Menu: Press and hold the Set button for a few seconds. This should see the hours flashing, indicating youre in the time setting mode.Navigate to the Time Format Option: In the time setting mode, press the Mode button again. You might have to press it multiple times to cycle through different settings like hours, minutes, year, month, date, and eventually, the 12/24-hour format setting.Toggle Between 12H and 24-Hour Format: Once youve reached the time format setting, use the Start/Stop button or another designated button (consult your manual) to toggle between 12H (12-hour) and 24H (24-hour) format.Confirm Your Selection: After selecting the desired format (12H), press the Set button to confirm your choice and exit the setting mode. The watch should now display the time in your selected format.Important Note: If you accidentally change other settings during this process, simply use the Mode button to cycle back to those settings and use the Start/Stop button to adjust them accordingly. Always refer to your user manual for precise instructions tailored to your specific Armitron watch model.Troubleshooting Common IssuesSometimes, changing the time format can be a little tricky. Here are a few common issues and potential solutions:Buttons Not Responding: Ensure the battery is not low. A weak battery can cause erratic behavior. Replace the battery if necessary.Unable to Enter Setting Mode: Make sure you are on the correct screen (the timekeeping display) before pressing and holding the Set button.No 12/24 Hour Format Option: Some very basic Armitron models might not offer the option to switch between 12-hour and 24-hour formats. In this case, the watch will be permanently set to one or the other.Accidental Changes: If you accidentally change other settings, carefully cycle through each setting (hours, minutes, date, etc.) using the Mode button and adjust them using the Start/Stop button before confirming with the Set button.Frequently Asked Questions (FAQs)Here are answers to frequently asked questions regarding changing the time format on your Armitron watch:Can I change the time format on all Armitron watches?Generally, digital Armitron watches offer the option to switch between 12-hour and 24-hour formats. However, some basic models might not have this feature. Analog watches do not display in military time; they always use the 12-hour format. Always consult your specific watchs user manual.Where can I find the user manual for my Armitron watch?The user manual is usually included in the watch packaging. If youve lost it, you can often find a digital version on the Armitron website by searching for your watch model number. Search engines can also be helpful in locating your manual.My watch has different button labels. How do I find the equivalent functions?Even if the button labels are different, the functions remain generally the same. Look for buttons that seem to correspond to the descriptions: a button to navigate through settings (Mode), a button to enter the settings menu (Set), and a button to adjust the values (Start/Stop or similar). The manual is critical here.I pressed the wrong button and messed up the date. How do I fix it?Repeat the steps for entering the setting mode (press and hold Set). Then, use the Mode button to cycle through the different settings (hours, minutes, month, day, year) until you reach the date setting. Use the Start/Stop button to adjust the date to the correct value, and then press Set to confirm.What does AM and PM mean on my watch display?AM stands for ante meridiem, meaning before noon, and indicates the hours from midnight to noon. PM stands for post meridiem, meaning after noon, and indicates the hours from noon to midnight. This is only relevant when youre using the 12-hour format.The screen is blank. What should I do?The most likely cause is a dead battery. Replace the battery with a new one of the correct type. If replacing the battery doesnt solve the problem, consult a watch repair professional.My watch is beeping while Im trying to change the settings. Is this normal?Some Armitron watches emit a beep sound when a button is pressed in setting mode. This is normal and indicates that the button press was registered.How often should I replace the battery in my Armitron watch?The battery life of an Armitron watch depends on the model and usage. Generally, a battery lasts between 1 and 3 years. Watch for signs of a weak battery, such as a dim display or erratic behavior.Can I damage my watch by pressing the buttons too hard?While the buttons are designed to withstand normal use, excessive force can damage them. Press the buttons firmly but gently.What is the difference between an LCD and LED display? Which one do Armitron watches use?LCD (Liquid Crystal Display) and LED (Light Emitting Diode) are two types of display technologies. LCDs reflect ambient light, while LEDs emit their own light. Armitron digital watches typically use LCD displays as they are more energy-efficient.Why is my watch displaying a different time than what it actually is after changing the format?After changing the format, double-check that you have the correct time set in either 12-hour or 24-hour format. If you set it to 12-hour, make sure youre paying attention to the AM/PM indicator.My watch is water resistant. Can I change the settings while its submerged in water?No, do not attempt to change any settings while the watch is submerged in water. Pressing the buttons underwater can compromise the seals and allow water to enter the watch, potentially damaging the internal components. This Armitron Watch is warranted to you, the owner, for your lifetime against all defects in material or workmanship. This warranty does not apply to normal wear and tear or abuse and excludes batteries, case, strap, crystal, or bracelet. In the event of a defect or malfunction of the movement within this period it will be repaired or replaced at our option provided that it is returned prepaid with a check or money order for $9.95 to cover the cost of handling and return postage. If you do not receive a receipt within a reasonable time, start a tracer through the originating post office.For Parts and Services, please call1-866-631-0342 or 718-784-0700 or email servicedept@egluck.com.Neighborhood in New York CityLittle Neck" redirects here; not to be confused with Littleneck.Neighborhood of Queens in New York CityDouglastonNeckNeighborhood of Queens Clock of shops on Douglaston Parkway; the National Art League occupies part of this block Location within New York CityCoordinates:40°46′N 73°45′W / 40.77°N 73.75°W / 40.77; -73.75Country United StatesState New YorkCity New York CityCounty/BoroughQueensCommunity DistrictQueens 11[1]Founded byGeorge DouglasPopulation(2010)Total17,823EconomicsMedian income $85,500 (2019)[2]Time zoneUTC5 (EST)Summer (DST)UTC4 (EDT)ZIP Codes11362, 11363Area codes718, 347, 929, and 917Douglaston Little Neck is a neighborhood in the northeastern part of the New York City borough of Queens. The community is located on the North Shore of Long Island, bordered to the east by the region of Great Neck in Nassau County, to the south by Glen Oaks and the North Shore Towers, and to the west by Bayside. The neighborhood is composed of two main sections. Little Neck is generally used to refer to the area east of Marathon Parkway and/or north of Northern Boulevard, while Douglaston is the west of the neighborhood; these classifications may overlap depending on different interpretations of neighborhood boundaries. Each of these areas has several subsections. DouglastonLittle Neck represents one of the least traditionally urban communities in New York City, with many areas (particularly those north of Northern Boulevard) having a distinctly suburban feel, similar to that of Nassau County towns located nearby such as Great Neck.The area is also known for its historical society and other civic groups, notably the Douglaston Civic Association and the Douglas Manor Association. There are two historic districts, Douglas Manor and Douglaston Hill, and two houses, Allen-Beville House and Cornelius Van Wyck House, listed on the National Register of Historic Places in the neighborhood.[4]DouglastonLittle Neck is located in Queens Community District 11 and its ZIP Codes are 11362 and 11363.[1] It is patrolled by the New York City Police Department's 111th Precinct.[5] Politically, DouglastonLittle Neck is represented by the New York City Council's 19th and 23rd Districts.[6]DouglastonLittle Neck is bounded by Cross Island Parkway to the west, Grand Central Parkway to the south, the New York City-Nassau County border to the east, and Little Neck Bay to the north.[7][8]Douglaston is considered to be the area located west of Marathon Parkway and north of Grand Central Parkway.[9] According to The New York Times, Douglaston comprises six distinct neighborhoods.[8] Douglas Manor,[11] and Douglaston Hill are located north of Northern Boulevard, on the peninsula abutting Little Neck Bay.[8] Douglas Manor takes up most of the peninsula located north of the Long Island Rail Road's Port Washington Branch, while Douglaston Hill takes up a small section between the LIRR and Northern Boulevard.[9] Douglaston Park is the area located between Northern Boulevard and Interstate 495 (I-495, the Long Island Expressway). Additionally, there are two areas south of I-495, Winchester Estates and an area simply called Douglaston. Winchester Estates is located west of Douglaston Park and the remainder of the area south of I-495 is without a distinct name other than Douglaston.[8]Little Neck is the area east of Marathon Parkway and north of Grand Central Parkway.[12] Little Neck itself has three subsections: Pines, Westmoreland, and Little Neck Hills.[7]The earliest known settlement of the area that would become DouglastonLittle Neck were the Matinecock Native Americans. They were sustained by the seafood in Little Neck Bay.[13]Early Dutch settlers were drawn to the area by the rich land and abundant fishing. In the 17th century, European settlers began arriving in the area for its conveniently located harbor. Soon after, the British and Dutch gained control of the Matinecock lands peacefully, except for a small area known as Madnan's Neck (possibly a shortened form of Native American name for the area, Menhaden-ock, or "place of fish").[14] Thomas Hicks, of the Hicks family that eventually founded Hicksville, and a band of armed settlers forcibly drove out the Matinecock in a battle at today's Northern Boulevard and Little Neck Parkway.[15]In 1796, Hicks's estate passed to Thomas Wickes (17701854), and in 1819, to Wyant Van Zandt, a wealthy merchant, who built a large Greek Revival mansion in the area. Today, this mansion houses the Douglaston Club, a private club with tennis courts, social activities and swimming pools. In 1835, George Douglas bought 240 acres (0.97km2) of land along with Van Zandt's mansion. Upon Douglas' death in 1862, the land was inherited by his son, William Douglas.Douglaston Hill is the oldest area of the community, and is characterized by turn-of-the-20th-century homes. It was laid out with very large lots in 1853, at the very beginning of a movement in the United States to create suburban gardens. The area was recognized as a New York City Historic District in December 2004 by the New York City Landmarks Preservation Commission.[16] The Douglaston Hill Historic District was listed on the National Register of Historic Places in 2000.[4]The settlers thrived producing produce for the Manhattan market and the area was used as a dock on Little Neck Bay. The Little Neck and Douglaston stations opened in 1866 on the North Shore Railroad (now the Long Island Rail Road's Port Washington Branch and the same line featured prominently in the famous F. Scott Fitzgerald novel The Great Gatsby) to serve the community and the dock area.[7] Northern Boulevard was developed into a commercial and cultural hub, and the Little Neck Theater, a 576-seat movie theater, was opened in 1929 at the intersection of Northern Boulevard and Morgan Street.[17][18] The theater was closed in 1983.[19]From the 1860s through the 1890s, small hard clams (quahogs) from Little Neck Bay were served in the best restaurants of New York and several European capitals.[20] Eventually, the term "littleneck" or "littleneck clam" came to be used as a size category for all hard clams, regardless of origin.[21][22]Little Neck was also famous for being the last stop on the Douglaston Railroad until 1865.In the early 20th century, the Rickert-Finlay Realty Company of Manhattan purchased 175 acres (0.71km2) of the Douglas' family holdings, and formed the Douglas Manor Association, creating a planned community. Many of the houses in this area were built in architectural styles popular at the time, such as Tudor, Mediterranean, Colonial Revival, and Arts and Crafts. In 1997, New York City's Landmarks Preservation Commission designated Douglas Manor as the last photographs of the cemetery was taken by the Daily News in August 1931, a few months before it was removed to make room for a widened Northern Boulevard.[25] The remains from the cemetery were moved to the Zion Episcopal Church of Douglaston.[26]Other areas of DouglastonLittle Neck were developed during the latter half of the 20th century. Douglaston Park contains a mixture of large, older homes as well as Capes, Tudors, and ranch-style homes dating from the 1960s. The areas adjacent to the Douglaston Shopping Center are occupied mainly by attached single-family homes built in the 1950s through 1970s (Beech Hills, Deepdale, and another development known colloquially as the "Korvette's Houses" due to the former proximity of an E.J. Korvette department store), as well as four-story condominiums added in the mid-1980s.[8]In addition to the DouglastonLittle Neck has many independently owned and operated restaurants and shops, many of which are located in the area around the intersection of Douglaston Parkway or Little Neck Parkway and Northern Boulevard.[44]The Queens Giant measures 133.8 feet (40.8m) tall and is probably the oldest living thing in the New York metropolitan area.Several parks are under the administration of the New York City Department of Parks and Recreation. Along the western waterfront is Allen Pond Park, a 635-acre (2.57km2) wildlife and bird sanctuary, and home to the Queens Giant, the oldest known tree (and living thing) in New York City. To the east along the water is Udalls Cove, a 90-acre (360,000m2) wildlife sanctuary.Because northern DouglastonLittle Neck is surrounded by water, many residents take advantage of the waterfront. The Douglaston Yacht Squadron[45] is the local yacht club (there is also a junior yachting program called Douglaston Junior Sailing (DJYS), which teaches youngsters under the age of 16 years how to sail. It is a part of the Douglaston Club, a country club based in Douglas' original mansion in Douglas Manor. The Douglaston Club is also site of various community events, such as the Douglaston Chess Congress' annual championships, which decides the community's best players. Tennis is also a popular sport in the neighborhood.Southern DouglastonLittle Neck has an 18-hole, par 67 golf course. Formerly known as the North Hills Country Club, the 104-acre (0.42km2) course opened in 1927 and became a municipal course in the 1960s. The Douglaston Park Golf Course underwent significant renovations in 2004. The course is situated at one of the highest points in the borough of Queens, providing views of the Manhattan skyline, and has a restaurant.P.S. 94 on 42nd AvenueDouglastonLittle Neck and Bayside generally have a higher rate of college-educated residents than the rest of the city as of 2018[update]. The majority (52%) of residents age 25 and older have a college education or higher, while 11% have less than a high school education and 37% are high school graduates or have some college education. By contrast, 39% of Queens residents and 43% of city residents have a college education or higher.[29]6 The percentage of DouglastonLittle Neck and Bayside students excelling in math rose from 70% in 2000 to 88% in 2011, though reading achievement stayed at around 73% during the same time period.[46]DouglastonLittle Neck and Bayside's rate of elementary school student absenteeism is lower than the rest of New York City. In DouglastonLittle Neck and Bayside, 9% of elementary school students missed twenty or more days per school year, the lowest in the city and significantly lower than the citywide average of 20%.[30]:24 (PDF 5), 55[29]:6 Additionally, 95% of high school students in DouglastonLittle Neck and Bayside graduate on time, more than the citywide average of 75%.[29]:6DouglastonLittle Neck and Bayside contains several public elementary schools:[47]PS 94 David D. Porter (grades PK-5)[48]PS 98 The Douglaston School (grades PK-5)[49]PS 221 North Hills (grades PK-5)[50]PS 811 Multiple Handicap School of Queens (grades 16), is devoted to students with physical and mental disabilities. It is an elementary school, for grades 1e-16.[51]These schools included in the U.S. Open as Holiday Festival Assessment and Community Health Improvement Plan. Take Care New York 2020" (PDF). nyc.gov. New York City Department of Health and Mental Hygiene. 2016. Retrieved June 2, 2018.^ a b Louis Pasteur Middle School, which hosts children in grades 6 through 8.[52] After middle school, children are zoned for Benjamin N. Cardozo High School, in southwestern DouglastonLittle Neck and Bayside.[53]The Immaculate Conception Center,[54] formerly a college-level seminary named Cathedral College of the Immaculate Conception and owned by the Diocese of Brooklyn, is located in southeastern Douglaston. It is a large conference center, hosting Diocese events and activities including language immersion classes, lay ministry preparation, adult continuing education, seminarian instruction, parish retreats, and also hosts community civic conferences. In the Fall of 2011, all administrative offices were relocated and the building hosted eighty undergraduate seminarians studying at nearby St. John's University, in addition to retired priests from the Diocese of Brooklyn.The Queens Public Library operates two branches in the neighborhood. The Douglaston/Little Neck branch is located at 249-01 Northern Boulevard,[55] and the North Hills branch is located at 57-04 Marathon Parkway.[56]The Douglaston station, looking west from the Douglaston/Little Neck station overpassDouglastonLittle Neck is served by two stations on the Long Island Rail Road's Port Washington Branch. The Douglaston station is located at 235th Street and 41st Avenue, while the Little Neck station is located at Little Neck Parkway and 39th Road.[57] The latter is located next to a busy railroad crossing with Little Neck Parkway, which is connected to the subway. In addition, the QM5, QM8 and QM35 express buses provide direct service to Manhattan, while the n20G and n20X buses provide closed-door bus service between the neighborhood and Roslyn.[60]Two major Long Island highways pass through DouglastonLittle Neck: Interstate 495 (the Long Island Expressway) and the Cross Island Parkway. A third, the Grand Central Parkway, forms the southern boundary of the neighborhood.The area is served by the Little Neck Ledger, owned by the TimesLedger Newspapers,[61] a chain of 14 weekly newspapers spread throughout Queens. Media giant News Corporation, which also owns the New York Post, bought TimesLedger in October 2006.Claudio Arrau (19031991), pianist[62]Lidia Bastianich (born 1947), celebrity chef (current resident)[63]Ruth Benedict (18871948), anthropologist, lived here after her marriage in 1914[64]Deborah Berke (born 1954), architect of Deborah Berke & Partners and dean of Yale School of Architecture since 2016[65]Hugh Auchincloss Brown (18791975), electrical engineer and conspiracy theorist, proponent of the cataclysmic pole shift hypothesis[66]John Matthew Cannella (19081996), United States federal judge who played as an offensive lineman in the NFL for the New York Giants in the 1930s[67]Mary Carillo (born 1957), sportscaster and former professional tennis player[68]James Conlon (born 1950), conductor[69]Alex Corbisiero (born 1988), international rugby player who played for the Northampton Saints[70]Whitey Ford (19282020), baseball player with the New York Yankees and member of the Baseball Hall of Fame[71]George Grosz (18931959), artist[72]Hedda Hopper (18851966), gossip columnist, actress[73]Jill Johnston (19292010), cultural critic for the Village Voice[74]Alan Kalter (19432021), announcer on the Late Show with David Letterman[75]Philip La Follette (18971965), three-term Governor of Wisconsin[76]Angela Lansbury (19252022), actress[77]Chance Kelly (born 1966), tennis player[81]Patrick McEnroe (born 1966), tennis player[82]Robert Merton (19151968), Trappist monk and the brother of Lord Scofield Reference Bible[86]Oscar Shaw (18871967), stage and screen actor and singer[citation needed]Frank Spangenberg (born 1957), record-holding Jeopardy! champion[87]George Tenet (born 1953), Director of Central Intelligence for the United States[88]Arthur Treacher (18941975), actor[89][90]Julian M. Wright (18841938), judge advocate of the international court in Cairo, Egypt[91]Scenes from the movies American Gangster, Black Rain, Little Children, The Arrangement, I Never Sang for My Father, Cops and Robbers, and After-Life were filmed in the community. The films Rabbit Hole (2010), Son of No One (2011), and Run All Night (2014) were shot in the neighborhood.The Zion Episcopal Church was the setting for the television ministry for Newsmore, Pennsylvania. Many Hudson, a character in "The Laughing Man", a short story by J. D. Salinger, is from this community. "Machine", the masked character from the 1999 film 8mm, lived with his mother in DouglastonLittle Neck.^ a b "NYC Planning | Community Profiles". communityprofiles.planning.nyc.gov. On a digital sports watch, hold the Reset button until you hear a beep and press Mode to select the value you want to change. Make adjustments with the St/Stp button.On an analog watch, pull the crown out to the first click to set the date, and pull the crown out to the second click to adjust the time.If your method doesnt work or you think your watch is malfunctioning, reach out to Armitrons customer service and ask them to email you the manual you need. See the Reset button on the top left side of your Armitron watch beeps. Locate the Reset button on the top left side of your Armitron watch or until it beeps. You should notice numbers on your screen start flashing.[1]Depending on your watch model, the button may say Set instead of Reset.This process should work for every Armitron watch, but the location and order of the specific buttons may be different (they're labeled). For example, on some models, the Reset button is on the bottom left instead of the top left. 2Press the Mode button to choose the hours, minutes, day, or date. The Mode button is usually on the bottom right side of your Armitron sports watch. Each time you press the Mode button, a different section of your screen display will start flashing. This way, you can easily switch between changing the hour, minutes, day, and date. Keep pressing Mode until you reach the value you want to change.[2]Whatever is flashing on your watch is the value you're changing.People often skip over the day on accident. You can cycle through the 7 days of the week when the small abbreviation for the day is blinking. It is easy to miss on some models. Advertisement 3Increase the value by pressing the St/Stp button. Locate the St/Stp button; its usually on the top right side of the watch. After youve selected the value you want to change with the Mode button, press St/Stp until you reach the correct value. If you need to reach an earlier time or day, keep pressing the button until it cycles through again.[3]Check if your watch uses another button to increase the value. Refer to your manual to find out.Some watches only have one directional button you press to change the value, so youll need to cycle through the complete day or time if you pass the value you want. Some watches have two buttons or a single button that you hold to change the value in the opposite direction. 4Press the Reset button to lock in all of the information. Once you're happy with the adjustments you made to the time and date, press the Reset button to lock in all of the information correctly, press the Reset button to lock in all of the information. Check your watch over the course of the next day to make sure the time is correct.[4]If there is a fourth button on your watch, it most likely is the light button. Press this to illuminate your watch face. Pinch the crown in between your fingers and pull it out until it clicks once. If you hear more than 1 click, push the crown back in and pull it out slowly.[5]The crown on Armitron watches typically has two different positions. Pulling it one click adjusts the date, and pulling it 2 clicks adjusts the time. 3Turn the crown clockwise to move the date forward or back. Keep turning it until the correct date is in the window on your watch face. If you only needed to change the date, push the crown all the way in to set it.[6]Avoid adjusting the date on your watch between 11 PM and 5 AM since that's when it advances to the next day.[6]Pull the crown until it clicks a second time to adjust the day and time. If you have a watch that displays the day of the week, pull the crown until it clicks twice. If your watch doesn't have that display, simply pull the crown until it doesn't go any further.[7]You cant move the day or date without changing the time. Youll need to spin the clock completely around in 24-hour cycles.4Rotate the crown until the day of the week is correct. Continuing clockwise. Turning clockwise or counterclockwise depending on the watch model you're using. Spin the hands for 2 full rotations around the watch face to move forward by 24 hours. Keep turning the crown until the date advances and the day is correct. The time will also change.[8]Avoid turning the hands clockwise or counterclockwise until you reach the right time, push the crown all the way back in and the day date is correct, turn the crown until the hands point at the correct time. Get as close as you can to the right time so your watch is accurate within a minute or two.[9]The hands won't start moving on their own until you set your watch with a military-time dial, make sure it's correct before pushing the crown all the way in to lock your time again. Check the watch periodically throughout the day to make sure it displays the correct time.[9]Adjust the time by rotating the crown. Once you have the day of the week and date set, turn the crown clockwise to move the hands in the right direction. Get as close as you can to the right time so your watch is accurate within a minute or two.[9]The hands won't start moving on their own until you set your watch with a military-time dial, make sure it's correct before pushing the crown all the way in to lock your time again. Check the watch periodically throughout the day to make sure it displays the correct time. On an analog watch, pull the crown out to the first click to set the date, and pull the crown out to the second click to adjust the time. ^ https://... Armitron 45/7042, a sports watch with red around it. The alarm goes off every 3-ish minutes. How do I stop it? Press mode until at 2 or a3 pops up then where it should work. Question I have an Armitron 45/7041, a sports watch with red around it. The alarm goes off every 3-ish minutes. How do I stop it? Press mode until a2 or a3 pops up then where it should work. Question I have an Armitron Sports watch, black resin strap band with a silver plate ontop. The model says 45/7042. How do I change the hour format from 24 to 12? Go to setting the time and then hours. Change the hour time until you get to the time you want. It will cycle through Military time, then AM, then PM. Question I need to reset the day; it says Thursday, but it's Friday. How can I do that? Press mode until opens the time change, then press the right-side buttons. First minutes will be flashing; press again to change day of the week. Watch ManufacturerFor the robot, see Armatron.Armitron Company typeFamily businessIndustryWatch manufacturingFounded1975; 50years ago (1975)HeadquartersLittle Neck, New York, United StatesKey peopleEugen Gluck, FounderOwnerBarbara WeichselbaumWebsitewww.armitron.comAn automatic Armitron watch.Armitron is a watch brand manufactured by E. Gluck Corporation, headquartered in Little Neck, New York.[1] It was founded in 1975 by Eugen Gluck. As of 1999, Armitron had the fifth largest share of all watch purchasers, by brand, in the United States.[2]This section needs additional citations for verification. Please help improve this article by adding citations to reliable sources in this section. Unsourced material may be challenged and removed. (July 2017) (Learn how and when to remove this message)At the time of Armitron's founding, E. Gluck Trading Company was a subsidiary of Armin Corporation. It specialized in LED displays, free-function (hour, minutes, second, day and date) digital watches. The Armitron brand name is a combination of Armin and electronics. Often using cases from Switzerland and bracelets from Hong Kong, Armitron originally used LED watch movements produced by Computed Time Corp. a subsidiary of Armin Corporation[3] in Arlington, Texas.[4] These watches were also sold under other Armin Corporation brands such as Quasar and Saturn Time Corp.[4] Computed Time Corp. later was spun off into Texas Time, for which was briefly used by Armitron for LED models from 1978 to 1979 before switching primarily to foreign manufacturers.[4]In the late 1970s, E. Gluck Trading Company and Armin Corporation parted ways and the Armitron brand. As watch technology evolved and LED technology became less practical, LCD (liquid crystal display) displays were integrated into Armitron watches. Combined with Japanese quartz movements, these LCD watches were more accurate and durable. Advanced functionality, such as alarms and chronographs were later incorporated to enhance the benefits of this precise timekeeper.Through the 1980s, Armitron was widely identified by its connection with various professional sports teams and professional athletes. Jerry Rice, Boomer Esiason, Darryl Strawberry, Dwight Gooden, Larry Bird and others were endorsers of the brand. Armitron remains an Official Sponsor of the New York Yankees.Today, Armitron continues to produce a range of quartz and digital timekeepers.Armitron is a clock sponsor at Yankee Stadium,[5] and for the original air of American Gladiators.^ Barmash, Isadore (November 17, 1991). You can help Wikipedia by expanding it.vteRetrieved from "Changing an Armitron watch from military time (24-hour format) to standard time (12-hour format) is usually the default display. This is usually involves accessing the watch's settings menu and toggling the display mode option. This article provides a comprehensive guide to navigate this process, covering various Armitron models and common troubleshooting steps.Understanding Armitron Watch Time SettingsArmitron watches are known for their durability and affordability, offering a range of features, including the option to display time in both 12-hour and 24-hour format. Knowing how to switch between these formats is essential for users who prefer the more conventional 12-hour clock. The specific steps can vary slightly depending on the watch model, but the underlying principles remain consistent. Is this article helpful to you? Identifying Your Armitron Watch ModelBefore attempting any changes, its beneficial to identify your Armitron watch model. This information is typically found on the watch's case back. Knowing your model will help you locate specific instructions in the user manual or online. While this article provides general guidelines, referencing your models manual is always the best practice.Common Armitron Buttons and FunctionsArmitron watches have four buttons, usually labeled A, B, C, and D (or Mode, Reset, Start, and Light, respectively). These buttons are used to navigate the watchs menu and adjust settings.Mode (or A): Typically used to cycle through different functions like displaying time, date, alarm, stopwatch, etc.Reset (or B): Often used to exit settings or reset values.Start (or C): Used to start or stop the stopwatch, or increment values within the settings.Light (or D): Activates the backlight for improved visibility.Understanding the function of each button is crucial to successfully changing the time format.Step by Step Guide to Change the Time FormatThe following steps outline the general process for switching an Armitron watch from military time to standard time.Enter Setting Mode: Press the Mode (or A) button repeatedly until you reach the time display. This is usually the default display screen. Then, press and hold the Mode (or A) button for a few seconds until the setting mode is activated. This is often indicated by the time display flashing.Navigate to Time Format Setting: Once in setting mode, use the Start (or C) button to cycle through the available settings. Look for an option that specifically mentions 12/24 Hour, Time Format, or similar wording.Toggle the Time Format: When the time format option is displayed, press the Mode (or A) button or the Reset (or B) button to toggle between the 12-hour and 24-hour format. Usually, the display will show 12H for standard time and 24H for military time.Confirm and Exit: After selecting your preferred time format, press the Mode (or A) button to confirm the setting and exit the setting mode. The watch should now display the time in the selected format.Note: The exact sequence of button presses may vary depending on your specific

model. Consult your watchs manual for precise instructions.Troubleshooting Common IssuesIf you are having trouble changing the time format, consider the following:Low Battery: A low battery can sometimes cause the watch to malfunction or revert to default settings. Try replacing the battery.Incorrect Button Press: Ensure you are pressing the correct buttons in the correct sequence. Refer to your watchs manual.Water Damage: Water damage can affect the watchs functionality. If your watch has been exposed to water, it may require professional repair.Factory Reset: Some Armitron watches have a reset function. Consult your manual to learn how to perform a factory reset, but be aware that this will reset all settings to their defaults.Frequently Asked Questions (FAQs)Here are some frequently asked questions about changing the time format on an Armitron watch:Q1: My Armitron watch doesnt have a Mode button. What should I do?If your watch doesnt have a button explicitly labeled Mode, look for buttons labeled Adjust or Set. These buttons often perform the same function, initiating the setting adjustment process. Consult your user manual for specific button functions for your model.Q2: Ive tried pressing all the buttons, but the time format setting wont appear.Some Armitron models require you to adjust other settings first, such as the year, month, and day, before the time format option becomes available. Make sure youve cycled through all the available settings in the setting mode.Q3: After changing the time format, the watch is still showing military time.Ensure you have correctly confirmed the setting by pressing the Mode (or A) button after selecting 12H. If the watch still displays military time, repeat the process and double-check each step.Q4: Can I change the time format on an Armitron analog watch?Armitron analog watches typically dont have a 24-hour display option. If the watch has a date function that displays the day of the week, there might be a setting to adjust this display. However, the primary time display will remain in the standard 12-hour format.Q5: Where can I find the user manual for my Armitron watch?You can usually find the user manual for your Armitron watch on the Armitron website or through a general online search using your watchs model number and user manual.Q6: Is it possible that my Armitron watch doesnt have the option to switch between 12 and 24-hour formats?Yes, it is possible. Some basic Armitron models may only support one time format, usually the 12-hour format. Check your watchs manual to confirm its features.Q7: How do I know if Im in the setting mode on my Armitron watch?When you are in setting mode, the display will typically flash or blink, indicating that the values are adjustable. Also, pressing the Start (or C) button will usually increment the displayed value.Q8: My Armitron watch is showing the wrong time after I changed the time format. How do I fix this?After changing the time format, you may need to adjust the hour and minutes to the correct time. Access the setting mode again and use the Start (or C) button to adjust the hour and minutes until the correct time is displayed.Q9: What does AM and PM mean on my Armitron watch?AM stands for ante meridiem, meaning before noon, and indicates the time between midnight and noon. PM stands for post meridiem, meaning after noon, and indicates the time between noon and midnight. This is relevant when the watch is set to the 12-hour format.Q10: Can a dead battery affect the time format on my Armitron watch?Yes, a dead or low battery can sometimes cause the watch to reset to its default settings, which may include reverting to the 24-hour (military time) format. Replacing the battery is often the first step in troubleshooting any display issues.Q11: Ive tried everything, and my Armitron watch still wont change from military time. What are my options?If youve exhausted all troubleshooting steps and the watch still wont change, its best to consult a qualified watch repair technician. They can diagnose and repair any underlying issues that may be preventing the time format from being changed.Q12: Will changing the time format affect other settings on my Armitron watch, like the alarm?Changing the time format should not directly affect other settings like the alarm. However, its always a good idea to double-check your alarm settings after making any changes to the watchs configuration to ensure they are still set correctly. John Foxx/Stockbyte/Getty Images Armitron began making watches in the 1950s and remains one of the leading American manufacturers. Some of the company's watches display military time, which uses a 24-hour clock. Pressing a few buttons will change the mode on any Armitron watch. Press the top left button on your watch once. The seconds should begin flashing. Press the lower left button six times until the 12/24-hour format appears. Press the top right button once to select the 12-hour time format. Press the top left button once to return to time telling mode. Share copy and redistribute the material in any medium or format for any purpose, even commercially. You don't need to be a master watchmaker to set or change the time on an Armitron watch. Image Credit: lechatnoir/E+/GettyImages Pro Sport Watch Add a Time Zone Analog Watch Guidance for Care Armitron makes several watches, many of which are great for tracking your workouts, charting split times and hitting your goals. But they're not smart watches, so the time doesn't set on its own.When you first get your watch, you'll need to set the time yourself. And when daylight saving time begins or ends, or you travel to different time zones, you'll need to know how to change the time on an Armitron watch.Here's everything you need to know about how to set an Armitron wrist watch and how to easily change the time. How to Set the Time on an Armitron Pro Sport Watch Follow the steps below from the Armitron Pro Sport Watch manual to set the time. You'll follow these steps anytime you need to set the time on the watch, including when you need to adjust for daylight saving time beginning (usually mid-March) or ending (early November), or when you first take the watch out of the box. To set the time on your Armitron Pro Sport Watch, you'll need to know which button does what. 1. Identify Watch Buttons There are four buttons on your watch.The top left button (A) is "Reset" The top right button (D) is "ST/STP," which stands for "Start" and "Stop."The bottom left button (B) is "Mode."The bottom right button (C) activates the light.To begin setting the time, hold the "Reset" button (A) until you hear a beep.Three out of the four screens on the watch will start to blink. That means you're ready to set the time.Press the bottom left button (B), "Mode" to access the hour setup.Note that pressing this button will not actually change the hour, but the hour side of the time display will start to blink. This indicates that you're ready to continue to the next step to set the hour.4. Use ST/STP to Adjust the Hour Press the "ST/STP" button (D) to change the hour.Each time you press the button, the hour will increase until it hits 12, after which it will restart at 1.Press the "Mode" button (B) again to set the hour. When you do, the hour side will stop blinking and the minutes will be ready for setting.5. Use ST/STP to Adjust the Minutes Press the "ST/STP" button (D) on the top right to increment minutes.Each time you press the button, the number of minutes increases by 1.Once your watch is set to the correct time, press the "Reset" button on the top left (A) to set the minutes.Want a 24-Hour Time Display? How to Add Multiple Time Zones If you're traveling and need to know the times in multiple time zones, you can set the time for another different time zone on your watch.Follow the steps below to set an additional time:To enter the Second Time Zone mode, press the "Mode" button 3 times. Press the "Reset" button. The hours icon will start flashing.Press the "ST/STP" button to change the hours.When you've set the correct hour, press the "Mode" button again. This will set the hours and allow you to change the minutes. The minutes icon will begin flashing.Press the "ST/STP" button again to increment the minutes. Once you've selected the correct minutes, press the "Reset" button to set the time.Press the "Mode" button to return to your main time zone. by Madeleine Burry by Marygrace Taylor by Jessica Campbell-Salley How to Change the Time on an Armitron Analog Watch Have an Analog Armitron watch and not a digital one? Follow the steps below, from the Armitron Analog Watch manual, to set the time: 1. Identify Crown Position The watch crown can be pulled into three positions.A. Neutral: This is the normal operating position.B. Position to double-check (for watches with date windows).C. Position to set the time.To change or set the time, pull the crown out until it is in position C. The second hand will stop moving.Rotate the crown forward or backward until the time is correct.Push the crown back in to position A to resume time keeping. You should see the second hand start to move again.Caring for Your Armitron Watch Most Armitron watches, both Sport and Analog, are water resistant. Analog watches likely have a depth limit on the back of the watch; ensure you're not wearing your watch if you go below this depth. For Sport watches or any Armitron with a push button, do not use any buttons under water.Armitron recommends taking your watch to a local jeweler to replace the battery. For Analog watches, the brand suggests having your local jeweler replace the gasket and O-ring every time you have the battery changed to ensure the watch remains waterproof.For larger repairs or maintenance, including cleaning, lubrication or having a crystal replaced, Armitron has a list of approved service centers where you can send your watch.More Fitness Trackers and Watches by Emily Abbate, CPT by Amy Schlinger, NASM-CPT by Amy Schlinger, NASM-CPT Image Credit: LIVESTRONG.com Creative Image Credit: LIVESTRONG.com Creative

You'll follow these steps anytime you need to set the time on the watch, including when you need to adjust for daylight saving time beginning (usually mid-March) or ending (early November), or when you first take the watch out of the box. To set the time on your Armitron Pro Sport Watch, you'll need to know which button does what. 1. Identify Watch Buttons There are four buttons on your watch.The top left button (A) is "Reset" The top right button (D) is "ST/STP," which stands for "Start" and "Stop."The bottom left button (B) is "Mode."The bottom right button (C) activates the light.To begin setting the time, hold the "Reset" button (A) until you hear a beep.Three out of the four screens on the watch will start to blink. That means you're ready to set the time.Press the bottom left button (B), "Mode" to access the hour setup.Note that pressing this button will not actually change the hour, but the hour side of the time display will start to blink. This indicates that you're ready to continue to the next step to set the hour.4. Use ST/STP to Adjust the Hour Press the "ST/STP" button (D) to change the hour.Each time you press the button, the hour will increase until it hits 12, after which it will restart at 1.Press the "Mode" button (B) again to set the hour. When you do, the hour side will stop blinking and the minutes will be ready for setting.5. Use ST/STP to Adjust the Minutes Press the "ST/STP" button (D) on the top right to increment minutes.Each time you press the button, the number of minutes increases by 1.Once your watch is set to the correct time, press the "Reset" button on the top left (A) to set the minutes.Want a 24-Hour Time Display? How to Add Multiple Time Zones If you're traveling and need to know the times in multiple time zones, you can set the time for another different time zone on your watch.Follow the steps below to set an additional time:To enter the Second Time Zone mode, press the "Mode" button 3 times. Press the "Reset" button. The hours icon will start flashing.Press the "ST/STP" button to change the hours.When you've set the correct hour, press the "Mode" button again. This will set the hours and allow you to change the minutes. The minutes icon will begin flashing.Press the "ST/STP" button again to increment the minutes. Once you've selected the correct minutes, press the "Reset" button to set the time.Press the "Mode" button to return to your main time zone. by Madeleine Burry by Marygrace Taylor by Jessica Campbell-Salley How to Change the Time on an Armitron Analog Watch Have an Analog Armitron watch and not a digital one? Follow the steps below, from the Armitron Analog Watch manual, to set the time: 1. Identify Crown Position The watch crown can be pulled into three positions.A. Neutral: This is the normal operating position.B. Position to double-check (for watches with date windows).C. Position to set the time.To change or set the time, pull the crown out until it is in position C. The second hand will stop moving.Rotate the crown forward or backward until the time is correct.Push the crown back in to position A to resume time keeping. You should see the second hand start to move again.Caring for Your Armitron Watch Most Armitron watches, both Sport and Analog, are water resistant. Analog watches likely have a depth limit on the back of the watch; ensure you're not wearing your watch if you go below this depth. For Sport watches or any Armitron with a push button, do not use any buttons under water.Armitron recommends taking your watch to a local jeweler to replace the battery. For Analog watches, the brand suggests having your local jeweler replace the gasket and O-ring every time you have the battery changed to ensure the watch remains waterproof.For larger repairs or maintenance, including cleaning, lubrication or having a crystal replaced, Armitron has a list of approved service centers where you can send your watch.More Fitness Trackers and Watches by Emily Abbate, CPT by Amy Schlinger, NASM-CPT by Amy Schlinger, NASM-CPT Image Credit: LIVESTRONG.com Creative Image Credit: LIVESTRONG.com Creative
