Discover everything you need to know about Oakley's Prizm Ruby Lens, including its key benefits, ideal use conditions, and important factors to consider before purchasing. Before diving into the specifics of the Ruby lens, let's talk about Oakley's Prizm lens technology. Oakley Prizm lenses enhance contrast, color, and clarity, designed initially for specific sports like skiing, cycling, and shooting. However, their popularity has extended well beyond sports, becoming Oakley's standard lens offering across various frames and styles. Check out our complete guide to Oakley Prizm Lenses here – The Oakley Prizm Ruby lens is designed specifically for bright light conditions, featuring a bronze base lens color. Here are the key specifications: Contrast-Enhancing Prizm Technology 17% Visible Light Transmission (VLT) Ideal for Bright Light Conditions and Everyday Use 100% UVA, UVB, and UVC Protection Valentino Rossi Polished Black / Prizm Ruby Polarized Frogskins - Photo by Funky-Trixtar Prizm Ruby lenses excel in bright sunlight conditions. During testing, we found the lens significantly enhances contrast and effectively filters intense sunlight, aligning well with its advertised 17% VLT. The bronze base tint contributes to better color recognition and reduced eye strain, making this lens highly suitable for daily wear. However, if your primary use involves sports-specific activities, consider specialized options like Prizm Shallow Water Polarized or Prizm Gaming, tailored explicitly for these scenarios. Related: Oakley PRIZM Rose (Gold Polarized) Lens | ReviewOakley Latch Sunglasses with Prizm Ruby Iridium Lens - Photo by Funky-Trixtar If you're debating between the polarized and standard Prizm Ruby lenses, here's what you should consider: Standard Prizm Ruby lenses offer enhanced contrast suitable for general use. Prizm Ruby Polarized lenses provide additional glare reduction, significantly reducing eye strain and enhancing clarity, especially around reflective surfaces. We recommend the polarized option for those frequently exposed to reflective environments such as water, roads, or snow. Comparing Oakley's traditional Ruby Iridium with the newer Prizm Ruby: Ruby Iridium lenses have a grey base tint with 14% VLT. Prizm Ruby Iridium lenses have a bronze base tint with 17% VLT and enhanced contrast. Despite the slight difference in VLT, the real-world difference lies in the significantly improved contrast and clarity offered by the Prizm Ruby lenses. If contrast enhancement matters to you, Prizm Ruby is undoubtedly the superior choice. No Lenses (left) vs. Oakley Prizm Ruby Lenses (right) - Photo by Oakley Good news for prescription wearers! Oakley offers prescription options for nearly all Prizm lenses, including both standard and polarized Prizm Ruby lenses. Oakley prescription lenses typically range from +3.5 to -6.0 sphere and +5.0 to -5.0 cylinder. Explore our complete guide to Oakley prescription lenses – Oakley Prizm Ruby (top) vs. Ruby Iridium Polarized lenses (bottom) - Photo by Jontoad Pros: Excellent contrast enhancement and clarity. Strong performance in bright sunlight. Versatile enough for everyday wear. Prescription available. Related: Oakley Prizm Gaming Lens & GuideCons: Less optimal for specialized sports compared to sport-specific lenses. Ultimately, Oakley Prizm Ruby lenses are an excellent investment for anyone looking for vibrant color enhancement, superior clarity, and everyday usability in bright conditions. Create this site because of the lack of a place for the Oakley Community to talk. Feel free to Message me any time for feedback for the site or your Oakley lenses scratched, discontinued, or simply too expensive to replace? You're not alone. Choosing between original Oakley replacement lenses and aftermarket options is crucial for performance, safety, and value. This guide is your ultimate resource to making an informed choice in 2025. Best Budget Option: Revant Optics Best Premium Aftermarket: Linegear Japan & Fuse Lenses Authentic Oakley Lenses (Prizm technology). Only available through official Oakley stores Best Variety & Rare Models: Linegear Japan & The Sunglass Fix Keep reading to compare detailed reviews and expert tips on safely replacing your lenses. Today you can buy authentic Oakley replacement lenses directly from Oakley's website or stores. But this is also usually the most expensive option. If you're looking to save, you'll want to look at aftermarket replacement lenses. But first, you need to know exactly what to look for when buying aftermarket lenses because not all lenses are the same! The essential components of aftermarket lenses are: Material: Authentic Oakley lenses and high-quality aftermarket lenses should be polycarbonate or polyamide, providing high-impact resistance and 100% UV protection. Light Transmission: This indicates how much light passes through the lenses. The lower the number, the darker your lens tint will be. Color & Coating: You'll want to pay attention to the colors available and coatings offered by lens manufacturers. Many aftermarket suppliers offer mirror or Polarized coatings that are comparable to Oakley Iridium and HD Polarized. Steer clear of overly cheap lenses sold through sites like Alibaba. Unfortunately, these lenses often use non-polycarbonate plastics that can easily shatter and harm your eyes. They also won't offer the same UV protection either. While Oakley Plutonite lenses block 100% of UVA, UVB, and UVC rays, cheaper plastic won't. Many cheap sunglasses lenses only offer tint and do little to block UV rays. Now that you know what to look for when buying lenses, let's compare the best Oakley replacement lenses. Plus, how much each supplier is charging, so you can save before you buy! Oakley stores are the easiest place to buy high quality genuine lenses. For a lot of sunglasses, Oakley carries replacement lenses. Note, however, that replacement lenses for certain discontinued models are limited. Oakley's proprietary Prizm lenses are exclusively available through Oakley. In the past, almost every frame had replacement lenses available. But in recent years, Oakley appears to be making replacement lenses for only specific frames. Many are sports and activity-focused, like the Kato, M Frame, or Sphaera. Oakley Replacement lenses on the brand's website - Photo: Oakley And just because you don't see the pair you're looking for, you may not be out of luck. Try calling customer service. It's not uncommon for Oakley customer service reps to be aware of additional inventories of parts available specifically for older or discontinued models. Lenses typically cost between \$80-\$100 from Oakley. If Oakley doesn't sell lenses for your frame or you're looking to save, you'll want to check out aftermarket lens manufacturers. But it's also important to note that Oakley Prizm lenses are only available from Oakley as they are a proprietary lens technology. Revant continues to impress with affordable, USA-made lenses priced from \$25. They offer a wide range of colors and models, including the high-performance Elite series, ideal for active lifestyles. Starting in 2010, Revant surged onto the market via eBay and other marketplaces, selling lenses directly to consumers. Today their lenses cost \$24.99 a pair, a fraction of the price of original Oakley lenses. And since 2017, Revant has been producing all of its lenses in the USA. They've also begun offering a lot of colors and models not available through Oakley. We had the opportunity to review a pair of Elite lenses a few years ago and were impressed with their quality and how they compared to original lenses. You can check out the complete write-up here: Oakley Revant Frogskins Lens Review. Revant Elite Optics Lens Review for Oakley Frogskins A US-based lens provider, Seek Optics provides excellent value with lenses starting around \$23. Known for their impact resistance and extensive Oakley-compatible range (Holbrook, Gascan, Jawbreaker), Seek Optics is an economical yet reliable choice. Currently, they offer a variety of lenses for Oakley frames, including Holbrook, Flak 2.0, Gascan, Jawbreaker, and more! Seek Optics replacement lenses are available in a variety of colors Also, keep an eye on our deals and steals section, where they've been known to post their latest sales. Overall, we found Seek Optics to be a fantastic option for the price point. And be sure to read our complete Seek Optics review for more! Galaxy Lenses specializes in lenses and rubber kits, offering replacements parts for over 100 Oakley models. With prices from \$10-\$35, they combine quality (ANSI Z80.3 certified) with affordability. Plus, all Galaxy lenses are impact-resistant and rated to meet ANZI Z80.3. And with Rubber kits priced around \$10 and lenses ranging from \$10-\$30, they are competitive price-wise! Example of current offerings at Galaxy Lenses Lens Direct is new to the world of Oakley replacement lenses but not to eyewear. This family-owned glasses company has been around for over 30 years. Now, they're taking on replacement lenses, offering options for Oakley, Ray-Ban, and Maui Jim. Starting at \$21 for non-polarized lenses, lens direct offers polarized options for \$33 and \$45 for polarized non-reflective (mirrored) lenses. One of the biggest differentiators for Lens Direct is they offer an "Elite Installation" service, where you can mail them your frames and have them sent back with the new lenses. While we don't think this is worth the \$20 they charge, if you're worried about damaging your lenses during the swap, it could
be a good idea. If you're looking for X-Metals and rarer Oakley lenses, your only option is an aftermarket supplier. That's because Oakley has discontinued most of these pairs and their replacement parts. Related: Oakley PRIZM Sapphire Lens Review & GuideLinegear maintains a strong reputation among collectors. They offer exceptional quality and a wide selection of hard-to-find components. Covering many Oakleys, including the Juliet, X-Squared, Romeo, Penny, and more, they provide high-quality lenses and parts such as rubber earsocks and nose pads. With a quick search on our site, you can find plenty of resources on Linegear. As a Forum Sponsor here on OakleyForum.com, you can even message them directly and see their top deals! Plus, check out our full Linegear Review here. Oakley Linegear X-Metal Sunglasses with NXT Lenses One of the most prominent aftermarket lenses, Walleva sells replacement lenses for a wide range of sunglasses. And they sell other accessory parts too. You'll find most of their inventory through eBay, with a selection of lens colors and models for about \$15-\$35 a pair. Member Ventruck had the opportunity to review these lenses and was particularly impressed by their ability to match the tint of original Oakley lenses. You can read the full write-up here: Walleva Mr.Shield Lens Review. Walleva ISARC Lenses Fuse Lenses is another well-established brand that has expanded its product line in the last few years. And now they sell replacement lenses for almost every Oakley frame. With one of the widest catalogs of lenses, they continue to offer them for around \$30 per pair. They even offer color-enhancing lenses that are Fuse's version of Oakley's Prizm lenses, retailing for \$65. Member ajrbl reviewed these lenses for his Oakley X-Metal Xx Sunglasses and found the clarity and quality to be the same as the original manufacturer's lenses. But he did point out that you should determine the correct base curve (only applicable for certain Oakleys - specifically X-Metals). Check out his full Fuse Oakley Replacement Lens Review for more information. Oakley PitBoss with Fuse Replacement Lenses A newcomer to the field in 2022, The Sunglass Fix has been around since 2006 but just came onto our radar in the Oakley world over the last year. An Australian company, The Sunglass Fix, sells replacement lenses for an endless amount of brands (Ray-Ban, Revo, Maui Jim, and Armette, to name a few), including Oakley. But that variety also extends to frames. Today they offer replacement lenses for 390+ Oakley sunglasses, including rare and discounted frames like X-Metals. On the quality side, The Sunglass Fix produces lenses made of impact-resistant Polyamide, similar to Polycarbonate/Plutonite lenses. For pricing, lenses range from \$33.99 per pair to \$49.99 per pair, based on polarization and other options offered. Overall, we're impressed by The Sunglass Fix, and you can read our full SunglassFix.com review here. The Sunglass Fix offers one of the widest varieties of lenses on the market A last honorable mention on your journey for replacement lenses is purchasing original/aftermarket lenses second-hand. A quick search of Oakley Forum's Sunglasses Exchange shows hundreds of replacement lens listings! And other sites like eBay can be great options as well. The key in these transactions is pictures and quality. One person's "good condition" is another person's scratched. So be sure to carefully review detailed photos before purchasing, regardless of where you're buying from. Now that we've covered your options to buy replacement lenses, it's time to add one last-minute twist. Have you ever thought of cutting your own? Related: Oakley Sunglasses Lens Peeling & Flaking | Top 3 Causes & FixesWhile not for the faint of heart, you can make your own lenses. Head to our guide on How to Cut Oakley Lenses to see if you have what it takes. Now that we've reviewed the best aftermarket lenses, it's time to compare them! Choosing between authentic Oakley lenses and aftermarket alternatives ultimately depends on your budget and preferences. Oakley lenses offer guaranteed authenticity and premium technologies like Prizm. High-quality aftermarket suppliers listed above provide excellent performance at more affordable prices. On the quality side, The Sunglass Fix produces lenses made of impact-resistant Polyamide, similar to Polycarbonate/Plutonite lenses. For pricing, lenses range from \$33.99 per pair to \$49.99 per pair, based on polarization and other options offered. Overall, we're impressed by The Sunglass Fix, and you can read our full SunglassFix.com review here. The Sunglass Fix offers one of the widest varieties of lenses on the market A last honorable mention on your journey for replacement lenses is purchasing original/aftermarket lenses second-hand. A quick search of Oakley Forum's Sunglasses Exchange shows hundreds of replacement lens listings! And other sites like eBay can be great options as well. The key in these transactions is pictures and quality. One person's "good condition" is another person's scratched. So be sure to carefully review detailed photos before purchasing, regardless of where you're buying from. Now that we've covered your options to buy replacement lenses, it's time to add one last-minute twist. Have you ever thought of cutting your own? Related: Oakley Sunglasses Lens Peeling & Flaking | Top 3 Causes & FixesWhile not for the faint of heart, you can make your own lenses. Head to our guide on How to Cut Oakley Lenses to see if you have what it takes. Now that we've reviewed the best aftermarket lenses, it's time to compare them! Choosing between authentic Oakley lenses and aftermarket alternatives ultimately depends on your budget and preferences. Oakley lenses offer guaranteed authenticity and premium technologies like Prizm. High-quality aftermarket suppliers listed above provide excellent performance at more affordable prices. Check out the quick reference table below that compares all of the replacement lens options we reviewed: Oakley and Oakley VaultRevant OpticsSeek OpticsGalaxy LensesLens DirectFuse LensesThe Sunglass FixLinegear JapanWalleva LensesOakley Forum Exchange Original or Aftermarket?OriginalAftermarketAftermarketAftermarketAftermarketAftermarketAftermarketAftermarketBoth Coatings AvailableIridium, Polarized, PrizmMirrored, Polarized, Elite PolarizedMirrored, PolarizedMirrored, PolarizedStandardPolarized, Anti-ReflectiveMirrored, Polarized, Anti-Reflective, Polyamide (Nylon)Mirrored, Polarized, NXTPolared, Mirrored, Mr.ShieldPrizm, Polarized, Standard, Iridium Selection of Lenses (1-5)3/55/4/54/54/55/55/5/4/5 (Great for X-Metals)4/5/5/5 Prescription LensesYesYesNoNoYesYesNoNoNoDiscontinuedOakleysNoYesYesYesYesYesYesYes Prices\$40-\$120\$35-\$55\$22-\$45\$12-\$25\$21-\$45\$20-\$50\$33-\$50\$60-\$130\$10-\$40\$10-\$30 Can You Buy Prizm Replacement Lenses? Yes, exclusively through Oakley's official stores or website. Prizm technology is proprietary, meaning aftermarket alternatives offer different color-enhancing technologies. And while some aftermarket suppliers have their own version of contrast-enhancing lenses, they differ from the patented Prizm lenses. Are your Oakley lenses scratched, discontinued, or simply too expensive to replace? You're not alone. Choosing between original Oakley replacement lenses and aftermarket options is crucial for performance, safety, and value. This guide is your ultimate resource to making an informed choice in 2025. Best Budget Option: Revant Optics Best Premium Aftermarket: Linegear Japan & Fuse Lenses Authentic Oakley Lenses (Prizm technology). Only available through official Oakley stores Best Variety & Rare Models: Linegear Japan & The Sunglass Fix Keep reading to compare detailed reviews and expert tips on safely replacing your lenses. Today you can buy authentic Oakley replacement lenses directly from Oakley's website or stores. But this is also usually the most expensive option. If you're looking to save, you'll want to look at aftermarket replacement lenses. But first, you need to know exactly what to look for when buying aftermarket lenses because not all lenses are the same! The essential components of aftermarket lenses are: Material: Authentic Oakley lenses and high-quality aftermarket lenses should be polycarbonate or polyamide, providing high-impact resistance and 100% UV protection. Light Transmission: This indicates how much light passes through the lenses. The lower the number, the darker your lens tint will be. Color & Coating: You'll want
to pay attention to the colors available and coatings offered by lens manufacturers. Many aftermarket suppliers offer mirror or Polarized coatings that are comparable to Oakley Iridium and HD Polarized. Steer clear of overly cheap lenses sold through sites like Alibaba. Unfortunately, these lenses often use non-polycarbonate plastics that can easily shatter and harm your eyes. They also won't offer the same UV protection either. While Oakley Plutonite lenses block 100% of UVA, UVB, and UVC rays, cheaper plastic won't. Many cheap sunglasses lenses only offer tint and do little to block UV rays. Now that you know what to look for when buying lenses, let's compare the best Oakley replacement lenses. Plus, how much each supplier is charging, so you can save before you buy! Oakley stores are the easiest place to buy high quality genuine lenses. For a lot of sunglasses, Oakley carries replacement lenses. Note, however, that replacement lenses for certain discontinued models are limited. Oakley's proprietary Prizm lenses are exclusively available through Oakley. In the past, almost every frame had replacement lenses available. But in recent years, Oakley appears to be making replacement lenses for only specific frames. Many are sports and activity-focused, like the Kato, M Frame, or Sphaera. Oakley Replacement lenses on the brand's website - Photo: Oakley And just because you don't see the pair you're looking for, you may not be out of luck. Try calling customer service. It's not uncommon for Oakley customer service reps to be aware of additional inventories of parts available specifically for older or discontinued models. Lenses typically cost between \$80-\$100 from Oakley. If Oakley doesn't sell lenses for your frame or you're looking to save, you'll want to check out aftermarket lens manufacturers. But it's also important to note that Oakley Prizm lenses are only available from Oakley as they are a proprietary lens technology. Revant continues to impress with affordable, USA-made lenses priced from \$25. They offer a wide range of colors and models, including the high-performance Elite series, ideal for active lifestyles. Starting in 2010, Revant surged onto the market via eBay and other marketplaces, selling lenses directly to consumers. Today their lenses cost \$24.99 a pair, a fraction of the price of original Oakley lenses. And since 2017, Revant has been producing all of its lenses in the USA. They've also begun offering a lot of colors and models not available through Oakley. We had the opportunity to review a pair of Elite lenses a few years ago and were impressed with their quality and how they compared to original lenses. You can check out the complete write-up here: Oakley Revant Frogskins Lens Review. Revant Elite Optics Lens Review for Oakley Frogskins A US-based lens provider, Seek Optics provides excellent value with lenses starting around \$23. Known for their impact resistance and extensive Oakley-compatible range (Holbrook, Gascan, Jawbreaker), Seek Optics is an economical yet reliable choice. Currently, they offer a variety of lenses for Oakley frames, including Holbrook, Flak 2.0, Gascan, Jawbreaker, and more! Seek Optics replacement lenses are available in a variety of colors Also, keep an eye on our deals and steals section, where they've been known to post their latest sales. Overall, we found Seek Optics to be a fantastic option for the price point. And be sure to read our complete Seek Optics review for more! Galaxy Lenses specializes in lenses and rubber kits, offering replacements parts for over 100 Oakley models. With prices from \$10-\$35, they combine quality (ANSI Z80.3 certified) with affordability. Plus, all Galaxy lenses are impact-resistant and rated to meet ANZI Z80.3. And with Rubber kits priced around \$10 and lenses ranging from \$10-\$30, they are competitive price-wise! Example of current offerings at Galaxy Lenses Lens Direct is new to the world of Oakley replacement lenses but not to eyewear. This family-owned glasses company has been around for over 30 years. Now, they're taking on replacement lenses, offering options for Oakley, Ray-Ban, and Maui Jim. Starting at \$21 for non-polarized lenses, lens direct offers polarized options for \$33 and \$45 for polarized non-reflective (mirrored) lenses. One of the biggest differentiators for Lens Direct is they offer an "Elite Installation" service, where you can mail them your frames and have them sent back with the new lenses. While we don't think this is worth the \$20 they charge, if you're worried about damaging your lenses during the swap, it could be a good idea. If you're looking for X-Metals and rarer Oakley lenses, your only option is an aftermarket supplier. That's because Oakley has discontinued most of these pairs and their replacement parts. Related: Oakley PRIZM Sapphire Lens Review & GuideLinegear maintains a strong reputation among collectors. They offer exceptional quality and a wide selection of hard-to-find components. Covering many Oakleys, including the Juliet, X-Squared, Romeo, Penny, and more, they provide high-quality lenses and parts such as rubber earsocks and nose pads. With a quick search on our site, you can find plenty of resources on Linegear. As a Forum Sponsor here on OakleyForum.com, you can even message them directly and see their top deals! Plus, check out our full Linegear Review here. Oakley Linegear X-Metal Sunglasses with NXT Lenses One of the most prominent aftermarket lenses, Walleva sells replacement lenses for a wide range of sunglasses. And they sell other accessory parts too. You'll find most of their inventory through eBay, with a selection of lens colors and models for about \$15-\$35 a pair. Member Ventruck had the opportunity to review these lenses and was particularly impressed by their ability to match the tint of original Oakley lenses. You can read the full write-up here: Walleva Mr.Shield Lens Review. Walleva ISARC Lenses Fuse Lenses is another well-established brand that has expanded its product line in the last few years. And now they sell replacement lenses for almost every Oakley frame. With one of the widest catalogs of lenses, they continue to offer them for around \$30 per pair. They even offer color-enhancing lenses that are Fuse's version of Oakley's Prizm lenses, retailing for \$65. Member ajrbl reviewed these lenses for his Oakley X-Metal Xx Sunglasses and found the clarity and quality to be the same as the original manufacturer's lenses. But he did point out that you should determine the correct base curve (only applicable for certain Oakleys - specifically X-Metals). Check out his full Fuse Oakley Replacement Lens Review for more information. Oakley PitBoss with Fuse Replacement Lenses A newcomer to the field in 2022, The Sunglass Fix has been around since 2006 but just came onto our radar in the Oakley world over the last year. An Australian company, The Sunglass Fix, sells replacement lenses for an endless amount of brands (Ray-Ban, Revo, Maui Jim, and Armette, to name a few), including Oakley. But that variety also extends to frames. Today they offer replacement lenses for 390+ Oakley sunglasses, including rare and discounted frames like X-Metals. On the quality side, The Sunglass Fix produces lenses made of impact-resistant Polyamide, similar to Polycarbonate/Plutonite lenses. For pricing, lenses range from \$33.99 per pair to \$49.99 per pair, based on polarization and other options offered. Overall, we're impressed by The Sunglass Fix, and you can read our full SunglassFix.com review here. everyday use, holidays, or driving you only need the standard things from your eyewear. Black Iridium Polarized lenses are right for you in very sunny conditions as it can block out a lot of visible light and the polarization helps to reduce glare from the roads and pavements. Trail: Ideal for mountain-biking and hiking Go For: Red Iridium Polarized lenses When climbing or hiking up those mountains you can experience glare. Your eyes would also be exposed to harsh light from the sun. Red Iridium Polarized lenses will reduce glare and balance out any contrasting colours. These lenses are great in bright lighting and sunny/very sunny conditions such as the desert and hot countries. Road: Ideal for running and cycling Go For: Red Iridium Polarized lenses When running, jogging or cycling, you need protection against glare from asphalt or the pavements. Red Iridium Polarized lenses are ideal in medium-bright light and Persimmon (see image) is designed for sports performance and works well in low light. Water: Ideal for fishing and sailing Go for: Bronze Polarized lenses. When fishing or sailing, glare and haze which can affect your vision. To boost contrast and improve clarity, it is recommended that you opt for Bronze Polarized lenses. These are all-purposes lenses so they're also a popular choice for leisure activities i.e. holidays. Snow: Ideal for skiing and snowboarding Go for: Fire iridium lenses When skiing or snowboarding without protective sunglasses, you can experience temporary loss of vision (snowblindness) on top of glare and haze. Fire iridium lenses help to reduce glare and improve visual acuity allowing you to see better in the snow. Grass: Ideal for golf Go for: G30 lenses G30 lenses are sports performance lenses. G30 helps to improve contrast and depth perception in blues and greens. This is why these lenses are excellent for golf but can also be worn for tennis and any other sports activities surrounded by a lot of greenery.
