calendar todayPosted on 9th October 2020 Bishop is a 4th job Mage explorer class in MapleStory that acts as one of the most useful support classes in the game. Part of the original 4 jobs released, Bishop wield staffs and wands to deal magic damage to enemies, whilst also offering party-wide buffs and skills that help players get through the toughest bosses in MapleStory. Every new Mage starts in Maple Island and training to be a Bishop is just one of the ways players can utilise the Mage job branch. Bishop Overview The Bishop class has gone through many different metas in MapleStory, starting from when just 3rd job was available and Bishops were known as Priests. They would follow players around healing them, whilst casting the much sort after skill Holy Symbol (which gave 1.5x EXP). Today, MapleStory has evolved into a more solo-progression based game, however, Bishop's still offer some of the best party buffs in the game. A Bishop in end-game bossing is very much welcomed, not so much for their damage, but for their useful skills that allow players to survive for longer periods of time. There was a point where Bishop's were the best class in the game for training. Using their Full Map Attack skill Genesis, they could stay in one spot and spam Genesis for the best EXP. However, Bishop's have been revamped, along with every other explorer, and now those Full Map Attack skills have a 30 second cooldown period. Bishop's training are relatively slow compared to newest classes in MapleStory. The class is old and hasn't been properly updated since the MapleStory Red update. Training mechanics can feel very frustrating and slow. That being said, it is a rather simple class to play. Most of the time the class will teleport around maps and spam Big Bang skill, whilst occasionally buffing and using full-map attacks. Explorer Magicians can job advance into either Bishop, Ice/Lightning Arch Mage or Fire/Poison Arch Mage. Weapon: Staff & Wand Job: Mage Class: Explorer Shared Cash Shop Inventory: Explorer Jobs Legion Block: +Int (10/20/40/80/100) Link Skills: Empirical Knowledge (+1-3% Damage, +1-2% Ignore Def, stacks up to 3 times, 10 sec duration) Primary Stat: Int Inner Ability: +1 Attack Speed Magician First Job Skill Build You can max all your skills in 1st job. All magicians should follow this skill build. Energy Bolt (+1), Teleport (+1) Energy Bolt (MAX) Teleport (MAX) Magic Guard (MAX) MP Boost (MAX) Magic Armor (MAX) Your main attacking skill as a Magician is Energy Bolt. The energy bolt is a lot better than the pre-big bang version and can hit up to 4 enemies at once! You will want to max Teleport quite quickly as it allows for better mobility. Magic Guard is your most useful skill that you will be using even when you get to 5th job; it basically turns your MP into HP, allowing you to absorb massive amounts of damage. You can toggle this skill on/off. Skill Description & Overview Icon Skill Description Type Energy Bolt Consumes MP to fire a condensed energy bolt that explodes on contact with an enemy. Main Attack Skill Teleport Allows you to teleport to other locations on the same map using the arrow keys. Teleport MP Boost Increases Max MP permanently. Also increases MP proportional to your level. Passive Buff Magic Guard A portion of the damage dealt to you affects your MP instead of your HP. Does not apply to attacks that do a certain percentage of your max HP. Activated automatically when you have at least 1 MP, and is ineffective when you have 0 MP. Can be toggled Toggle Skill Magic Armor Uses magic to increase DEF. Passive Buff Cleric Second Job Skill Build You can max all your skills in 2nd job. As a Cleric, this build should work well: Holy Arrow (+1), Magic Booster (+2) Magic Booster (+6) Holy Arrow (MAX) Spell Mastery (MAX) Bless (MAX) High Wisdom (MAX) MP Eater (MAX) Invincible (MAX) Heal (MAX) Heal is last????? Heal is no longer the most useful mobbing skill for Clerics. It now has a 4 second cooldown and your Holy Arrow is a better mobber and deals more damage. Heal is really more of an end-game skill for bossing parties, and since you won't be attending to any of those in your Second job, you should max it last. Magic Booster will help to boost your attack speed and Bless is a great party buff for boosting damage. Skill Description & Overview Icon Skill Description Type Holy Arrow Attacks multiple monsters with Holy Arrows. Very effective against Undead and Devil monsters. Main Attack Skill MP Eater Absorbs the enemy's MP when attacking with Magic skills until the enemy's MP reaches 0. Does not apply to boss monsters. Passive Buff Spell Mastery Increases Magic Mastery and Magic ATT Passive Buff Magic Booster Increases Magic Attack Speed for a short time. Attack Speed Buff Invincible Decreases all damage taken. Passive Buff High Wisdom Permanently increases INT through mental discipline. Passive Buff Heal Restores the HP of all surrounding party members including yourself, and reduces Heal's cooldown by the number of people in your party. Monsters within the skill range are inflicted with the effect that increases incoming damage for a short duration. Undead monsters take additional damage. Heal Buff Bless Increases Attack Power, Magic ATT, and DEF for you and all nearby party members for a short time. Can be stacked with other buff skills. Buff Priest Third Job Skill Build You can max all your skills in 3rd job. Priests are best to follow this skill build: Shining Ray (MAX) Holy Symbol (MAX) Holy Focus (MAX) Arcane Overdrive (MAX) Teleport Mastery (MAX) Holy Magic Shell (MAX) Holy Fountain (MAX) Divine Protection (MAX) Dispel (MAX) Mystic Door (MAX) Shining Ray is still Priest's main attacking and mobbing skill. Leveling during 3rd job is pretty fast, so we don't max Holy Symbol until we've maxed our main attacking skill. Holy Symbol gives a massive +50% EXP to everyone in the party; however, it has been nerfed so that if players in the party move out of range of the character, they will get reduced rates. The rest of the skills are great for party bossing; Holy Magic Shell is your 15 second damage reduction skill and can act as an iframe in certain situations (20 second with Hyper Skills); Dispel for getting rid of Abnormal Status of party members, Holy Fountain for massive healing and more. Mystic Door also remains, but it's less useful now due to the ability of Hyper Teleport Rocks being so accessible. Skill Description & Overview Icon Skill Description Type Shining Ray Attacks multiple enemies at once with a ray of holy light. Deals massive damage to the Undead and Devil-type monsters. Main Attack Skill Holy Symbol Temporarily allows all nearby party members to gain additional EXP while hunting. However, if you go outside of the vicinity of the character that cast Holy Symbol, the efficiency will be reduced by half. Buff Teleport Mastery Causes enemies around your teleport location to take damage and become Stunned. Also permanently increases teleport distance. This skill can be toggled on and off with the skill key. Passive Buff Mystic Door Creates a portal that leads to the nearest town. All members of the party can use it multiple times until the portal disappears. Teleport Holy Magic Shell Holy Magic Shell has been activated and cannot be reactivated for a short period of time. Buff Holy Fountain Summons the Holy Fountain to recover party member's HP using holy power. Even a party member in Undead status can use it. Heal Buff Holy Focus Permanently increases all magic attacks, Heal magic Critical Rates, and Magic Mastery. Heal Buff Divine Protection Permanently increases Abnormal Status and Elemental Resistances. When used, you use holy power to create a holy barrier that blocks critical Abnormal Status. Upon casting Dispel, the cooldown is reduced according to the number of recovered party members. Buff Dispel Nullifies all enemy magic effects within the targeted area while removing some abnormal conditions suffered by nearby allies. Decreases Dispel and Divine Protection's cooldown. The Dispel skill can remove critical abnormal conditions, including KO, Seduction, Confusion, and Zombified. Dispell Buff Arcane Overdrive Permanently increases Critical Rate and Critical Damage. Passive Buff Bishop Fourth Job Skill Build You can max all your 4th job skills. You will need Mastery 20 and Mastery 30 books to increase the skill level beyond 10. These can be purchased from the Leafre general merchant shop. Big Bang (+1), Genesis (+1), Buff Mastery (+1) Arcane Aim (+1), Bahamut (+1) Big Bang (MAX) Arcane Aim (MAX) Buff Mastery (MAX) Advanced Blessing (MAX) Maple Warrior (MAX) Genesis (MAX) Infinity (MAX) Angel Ray (MAX) Bahamut (MAX) Resurrection (MAX) Hero's Will (MAX) Bishop's main purchasing skill is Big Bang. In order to be able to spam the skill, you need to cast Genesis every 30 seconds. Bishop then teleports around maps spamming Big Bang + Genesis. It's a very simple 4th job class. You can summon Bahamut, but it won't cover parts of the map you are not at. Resurrection is great for end-game bossing, and Infinity + Angel Ray makes for consistent damage during bossing. Skill Description & Overview Icon Skill Description Type Angel Ray Attacks with a holy arrow, dealing tremendous holy damage. Very effective against Undead or Devil monsters. Single Target Attack Skill Big Bang Gathers power to form an energy vortex, culminating in a powerful Holy explosion that decreases enemy DEF if the skill is fully charged when cast. Main Attack Skill Genesis A holy ray of light shines down from the sky, burning up to 15 monsters at once. Grants a bonus to Critical Rate. While this skill is on cooldown Big Bang casts instantly. FMA Skill Resurrection Resurrects a party member using a ray of holy light. Buff Maple Warrior Temporarily increases the stats of all party members. Does not stack with Maple Warrior, Call of Cygnus, Nova Warrior, Hero of the Flora, President's Orders, Anima Warrior, or Rhinne's Protection. Buff Infinity Lets you use skills without spending MP and increases knockback resistance. Also continually recovers HP and MP and increases the damage of all Magic Attacks. Not affected by cooldown reset. Buff Heros Will Hones your resolve to ignore certain abnormal status effects. Immune to Abnormal Status for 3 sec after use. Buff Buff Mastery Permanently increases Magic Attack and increases the duration of all buffs on you. Passive Buff Blessed Harmony Increases the effect of Blessed Ensemble. Passive Buff Bahamut Temporarily summons Bahamut to deal Holy damage. Bahamut can attack multiple enemies at the same time, and being attacked by Bahamut will make them extra vulnerable to Holy attacks. This skill is unaffected by enemy damage reflection skills. Summon Arcane Aim Ignores a portion of enemy Defense when attacking. Damage dealt increases with consecutive attacks. Stacks up to 5 times. Passive Buff Advanced Blessing Greatly increases nearby party member Attack Power, Magic ATT, DEF, Max HP, and Max MP. Reduces MP consumption upon using the skill. Can be stacked with other buff skills, excluding Bless. Buff Bishop Hyper Skills Build Hyper skills are available at level 140. You get Hyper Skill Points as you level towards 200, but not enough to max all the skills, so choose wisely. These skills mostly help increase the damage of your current skills. Holy Symbol - Experience Holy Symbol - Item Drop Holy Magic Shell - Persist Advanced Blessing - Ferocity Advanced Blessing - Boss Rush Heaven's Door Righteously Indignant Epic Adventure Heaven's door gives you an extra life in bosses (essentially an iframe). Enhance your Holy Symbol for that extra EXP and item drop boost. Bishop Fifth Job Skill Build Upon reaching level 200, you will now have access to the V Matrix, which acts as your new fifth job skills. Each class gets their own skills to use, along with boosting nodes to increase the damage of existing skills. To obtain new skills, you open up items called Nodestones, which drop from every mob in Arcane River. You have limited number of slots in your V Matrix, so you want to obtain perfect nodes for maximize your character's damage. Bishop's Nodes should include: Benediction Angel Of Balance Peacemaker Divine Punishment Trinode: Big Bang, Angel Ray, Genesis Trinode: Bahamut, Heaven's Door, (optional) All 5th Job classes should try to also obtain these: Decent Holy Symbol Decent Sharp Eyes Decent Speed Infusion Erda Nova Rope Lift Skill Description & Overview Icon Skill Description Type Benediction Calls upon your holy power to create a consecrated space that empowers and revitalizes your allies. Burst Buff Skill Angel Of Balance Summons an angel of balance possessing both compassion and vengefulness Summon Peacemaker Hurl the embodiment of divine power directly at your enemies Cooldown Attack Divine Punishment Punish the wicked in the name of Heaven. Cooldown Attack Skill Changelog 26/03/2021 - Added new 5th Job Skill from the Awake update. 09/10/2020 - First update
