Stephen Lilley and the ComputerRight ISO image by patrimonio Designs from Fotolia.com An MP4 file is a type of computer video file. Due to the compression method, MP4 video files are usually large in size. If you have a lot of videos and need to save space on your computer's hard drive, you can convert the MP4 file to the much smaller AVI file format. The quality of video and sound remains the same, but the file size is significantly reduced. You can use the free Handbrake program to accomplish this task. Click the Resource button. This will open a new window on your screen. In this new window, specify which MP4 video file on your computer's hard drive you want to convert to the AVI file format. Use the Destination section of the Handbrake window to specify exactly where you want the new AVI file to be placed on your computer's hard drive. Click the "Format" drop-down menu in the "Output Options" section of the main handbrake window. Select AVI from this menu. Press the green "Start" button at the top of the main handbrake window. Now Handbrake will convert your MP4 video file to AVI file format. Your new AVI file will be created in the directory you specified in the Destination section of the Handbrake window.
