Key Takeaways Astrology apps are a great way to infuse your life with a little cosmic insight, without needing to learn how to read the stars yourself. There are apps for interests and knowledge levels ranging from "just curious" to "professional astrologers." Apps for astrology can offer natal chart analysis, romantic guidance, daily meditations, upcoming astrological events, daily and monthly horoscopes, even altar suggestions! This guide includes apps for professional astrologers as well as the astro-curious. Apps that will help you analyze your birth chart, discover relationship compatibility, build your spiritual practice, and deliver your daily horoscope. It's good for beginners who may only know their sun zodiac sign, the one correlated to your birth. The app also has weekly, monthly, and annual readings if you ever feel the need for more overarching predictions. It's also very easy to navigate, and you can "favorite" specific horoscopes to save them. Download For: The Pattern focuses primarily on bonds and connections between people you know. You can add others by inviting them or searching for their username, or you can create a custom profile with someone's birth date and time. You can then view compatibility in both friendships and romantic relationships. This app also gives you a look into how you operate in life, work, and family matters. It provides overarching behavior cycles you may be experiencing, as well as worldwide predictions. The Pattern is free to download and use. However, you'll need to pay for a subscription or pay various other fees for deeper information. Download For: Co-Star is an extremely popular astrology app with a sleek, minimalist design. The app saves all the readings you receive, so you can go back to them whenever you want. Download For: If you're more interested in the actual workings of astrology and planetary movements, this is the app for you. TimePassages gives specific descriptions of planet positions and the impact they'll have on you. There's also a section in the app named Learn where you can read about astrological terms and get an understanding of how horoscopes are calculated. If you're interested in having this kind of knowledge, this app is a great resource. TimePassages has a free version with horoscopes, predictions, and more; you'll pay 99 cents for chart creation. There's also a \$9.99 version with unlimited birth charts, a Compatibility Meter, additional planetary position interpretations, and more. Download For: If you're an advanced astrologer in need of something more technical, you'll find Time Nomad to be a league above the other apps listed here.
