If you're already unhappy with the Pokemon Emerald aspect, here's a solution.

Pokemon Emerald - Randomizer ROM modifies the Pokemon Emerald Game file according to your requirements. Despite Emerald's appeal, the game doesn't have as much extra content as other advanced Pokémon games. Therefore, randomness guarantees that events coincide quite nicely. Pokemon Emerald - Randomizer Randizer can change the appearance of Pokémon, including their items. It can also change Pokémon Event, Wild Pokémon, Pokémon Trainer, Other Pokémon, Trainer Titles, Card Articles, TM Attacks, Pokemon Compatibility -TM. Finally, this randomness changes the Pokémon themselves, such as their types, stats, abilities, trays, travel kits, and elements of the wild. Download and use Pokemon Emerald - Randomizer ROM to mod Pokemon Emerald game on Android, PC, Mac and GBA operating systems. Play with emulator. Pokemon Emerald is one of my favorite games in the series. The expansion of the story and the addition of the battle wall actually put this game at the top of many people's lists. However, there is something called the Pokemon Emerald Randomizer and you can read on to learn more. What is the Emerald Pokémon Randomizer? Randomizer is not limited to Pokémon Emerald, but many players choose this game. No matter what the game is, the random feature is the same. The feature is that it accidentally changes the game, but not completely. The story of Random Emerald has remained the same, but you can change a lot in the game. Basically, the point is that you like to play casually. Also see: Nuzlocke Summoning Type Randomizer is a program that can help you turn Pokemon Emerald into something random. What can be changed randomly? One thing it can change is the appearance and classification of Pokémon in the game. It can start with three runners to choose from. Emerald Trico, Torchic and Mudkip.Snacks. Randomizer can change everything by chance. The same can be the same Pokémon that is generated in certain areas.

Your meeting level can also change if you want. In addition to Pokémon, objects in relation to where they appear and what appears in some places can also be random. This means that you cannot accelerate the game if there are objects in different areas, but the story is usually continued if you want. Then there are enemy trainers, Capalestra and Superquattro. You can have several Pokémon and the topic of the gym can be random. You would be surprised if a trainer could have a legendary Pokémon in his arsenal. The same can apply to the movements that Pokemon can learn. Pokémon moves from enemy trainers can also be selected random, but they mate with a random Pokémon. How do you get and use the Pokemon Emerald Randomizer? Step 1. The first thing you can do is download the randomizer program. Step 2. Install the program and activate it. Step 3. Select a Rome that should become random, and in this case it is Pokemon Emeraldo. Step 4. If the Rome is acceptable, you can choose different things in the game by chance. As mentioned above, you can arrange things like Pokémon, objects, trainers and more by chance. Step 5. When you are ready to change the desired things, generate the Rome and you have a new Emerald Pokemon Rome that was created by chance. Step 6. Charge a new Rome into the emulator and reproduce the newly created ROMs. Because playing a random emerald is considered something fun and interesting. Many people have already played Smeraldo and some people are already masters of the game. Even the randomized Rome playback can be a challenge. This is because you don't know which Pokémon you get and you don't know who your Pokémon is. All of your preparations can be thrown over the pile and a random game can be difficult.
