There are many valid and legal reasons one might have to feel the need to download Windows 7. For instance, you might be needed to reinstall or recover Windows 7 but not find the original Windows 7 setup DVD, or your netbook doesn't come with a DVD drive. In such cases, downloading Windows 7 should help you out, assuming you have bought a legal and valid key from Microsoft. A few days back, we had told you about an option to get the Windows 7 DVD from retail stores or download Windows 7 ISO directly from its servers online. In addition, customers can digitally download the Windows 7 installation files from the online store from which they purchased Windows 7 to clean install on a blank PC or upgrade the existing installed OS. The previous Windows 7 ISO file download links were in ".box" format, which comprised of a starter executable, setup1.box, and setup2.box, which cannot be burned to a DVD disc directly or mounted to a virtual DVD-ROM drive. As a result, the process to create a bootable Windows 7 DVD ISO image was pretty complex, and most of you found it challenging to get started. Luckily, Lifehacker has gotten hold of the complete listing of Windows 7 ISO direct download links. You don't have to try one of those shady Torrent sites now. Note that the ISO image is of SP1 build 7601.17514.101119-1850. Windows 7 ISO Download (Ultimate and Professional editions) The below links are directly from the official Microsoft servers. All of them are Service Pack 1 (SP1) ISO files and are roughly 5.5GB in size. So first, download the correct ISO file as per your existing Windows 7 license. Then, choose 64-bit or 32-bit based on your System type. Note: The below direct download links are English US ISO files. Download Windows 7 Ultimate ISO – 32-bit Download Windows 7 Ultimate ISO – 64-bit Download Windows 7 Professional ISO – 32-bit Download Windows 7 Professional ISO – 64-bit Download Windows 7 Home Premium ISO – 32-bit Download Windows 7 Home Premium ISO – 64-bit Download Windows 7 Enterprise ISO – 32-bit Download Windows 7 Enterprise ISO – 64-bit Download Windows 7 SP1 ISO – Directly from Microsoft Initially, Microsoft didn't bother to provide the ability to download Windows 7 OS in any format unless you purchased a retail version license online. In such cases, Microsoft facilitated digital versions through Digital River, the official distribution partner for Windows 7. Sadly, Microsoft removed those links in 2014. Right now, Microsoft still allows you to download Windows 7 ISO images directly from their servers through the software recovery page. Here is how you can download the Disc Images via the official channel legally and also create installation media such as a DVD or bootable USB drive to install Windows 7: Note: You need to have a genuine and valid retail Windows 7 product key before proceeding 1. Visit Microsoft Windows 7 ISO download page: 2. Enter the product key in the text box at the bottom of the page, and hit the Verify button. 3. Select the product language. 4. Select either the 32-bit or 64-bit version of Windows 7 for download. You can also use a download manager for this. 5. Burn the ISO image to DVD or write to a USB flash drive to create bootable USB drives and DVDs. Download Any Windows or Office ISO Using a Free Third-Party Tool That's right. Instead of Digital River, Microsoft is now using TechBench to store all the ISO files. It's not easy to find the ISO files for older Windows versions, but we will help you out. To start with, enter the Microsoft Windows and Office ISO Download Tool. This is a free-to-use third-party tool with a simple interface that lets you select the version of Windows you want, then downloads an ISO for that version straight from Microsoft's download servers. Of course, this is all legal and kosher. And you need to have a valid, genuine Windows 7 license key to use the Win 7 ISO files you just downloaded. Alternatively, here is yet another third-party tool to get Windows 7 ISO file download. Also on TechPP Windows 7 download ISO with SP1 Note: The below links are from Softpedia. You need to buy Windows 7 key from Microsoft Download Windows 7 Ultimate 32-bit x86 ISO Download Windows 7 Ultimate 64-bit x64 ISO Download Windows 7 Home Premium 32-bit x86 ISO Download Windows 7 Home Premium 64-bit x64 ISO Download Windows 7 Professional 32-bit x86 ISO Download Windows 7 Professional 64-bit x64 ISO Update: You can now download Windows 7 integrated SP1 ISO images. Download Windows 7 ISO Files from AdGuard This third-party website lists out the Windows 7 ISO file download for those with a valid product key but not serviced by Microsoft's official page above. Visit the link below, choose the Type as Windows (Final), version as Windows 7 SP1 (build 7601), edition as per your needs (Home Premium, Professional, Ultimate), language, and finally, the x64 or x32 ISO file. Download Windows 7 ISO file from AdGuard Windows 7 ISO Google Drive download links It's usually a bad idea to download ISO files from unknown random links. So this should be your very last option assuming none of the above links worked for you. Of course, it's convenient to download the files from Google Drive but proceed cautiously and with care. We got the below link via Reddit. Windows 7 ISO File download on Google Drive Windows 7 ISO File Download directly from Microsoft If you need to install or reinstall Windows 7, you can use this link to download a disc image (ISO file) to create your own installation media using either a USB flash drive or a DVD. As always, you need to have a valid Windows 7 product key (xxxxx-xxxxx-xxxxx-xxxxx-xxxxx) and sufficient data storage on your hard disk. Once you input the product key and verify, you will be able to choose either the 32-bit or 64-bit version for download. Windows 7 ISO file download from Microsoft Note: This page only accepts retail license keys, which you get only when purchasing a full boxed copy. If your computer is pre-built from a manufacturer such as Lenovo, Dell, or HP, your key will be of the OEM type, which cannot be used. FAQs about Windows 7 ISO Download Actually, the original Windows 7 ISO is bootable. Sometimes it is difficult for us to avoid some problems. For example, downloading the non-bootable Windows 7 ISO file. Many users ask us how to solve this problem. Here we show you how to create Windows 7 bootable iso file with WinISO. Download WinISO for free Launch the installable file and proceed with the installation. Open the downloaded windows 7 iso file. WinISO can automatically detect whether the image file is a bootable iso or a non-bootable one. It might be showing "non-bootable", which means that this Windows 7 iso does not contain boot information. However, WinISO can help you convert the file into a bootable Windows 7 iso. Be careful. You need to add specific boot information to specific files. The boot information is .bif image file which is very small. Here are the boot information files for Windows 7 Ultimate - 32-bit and 64-bit Once you have saved the boot image file, click the "Bootable" on the toolbar, choose the first option, "Set boot image". A window will pop up, and then choose the boot information you've got and click "Open". Save the new ISO file you have made. You can burn this into a blank DVD by clicking 'Burn' on the toolbar and choosing the Windows 7 bootable iso. We have given multiple links and have mentioned multiple ways above to download Windows 7 ISO free of cost. But mind you, although the file download is free, you still need to have a valid Windows 7 key in order to proceed with the installation. Not at all. Downloading Windows 7 ISO is very much legal and we have provided direct download links from Microsoft's own website in this article. But we repeat. You need to have a valid and legal Windows 7 key in order to proceed with the installation. Mainstream support for Windows 7 ended several years ago, and extended support will end in January 2020, but enterprise customers will continue to receive security updates into 2023. Updating Windows 7 is highly recommended to protect against the WannaCry, WannaCrypt, Specter, Meltdown, PrintNightmare, and Uiwix threats in Windows 7. Yes, you can download Windows 7 ISO files for free directly from Microsoft's servers. All of them are Service Pack 1 (SP1) ISO files and are roughly 5.5GB in size. Download the correct ISO file as per your existing Windows 7 license. Choose 64-bit or 32-bit based on your System type. Yes, absolutely. You can still download Windows 7 ISO in 2022, which too officially straight from Microsoft's own servers. We have also provided alternate links to direct download Windows 7. You just need to ensure you have a valid Windows 7 license and appropriate versions. Was this article helpful?YesNo For years, Microsoft allowed us to download Windows 7 ISOs through their content delivery partner, Digital River. On February 2015, the company decided to take those links down. Thankfully, there are a couple of ways to download Windows 7 ISOs, legally and for free, either by using Torrents or a free app that provides links straight from Microsoft. Unblock any international website, browse anonymously, and download movies and Mp3 with complete safety with CyberGhost, just for $2.75 per month: Why do we need to download Windows 7 Many of us bought our copy of Windows 7 pre-installed with a new desktop or laptop PC. More often than not, though, the box didn't contain a full Windows 7 DVD. Usually, we would get a "recovery disk" or a recovery partition, to reinstate the operating system to its default settings. But this would also restore all the third-party bloatware and crapware the manufacturers include. Remember Superfish? The ability to download Windows 7 ISOs is essential for anyone who wants a clean Windows installation for their PC. It is also handy if we misplaced, lost, or destroyed our original disk. How is it legal to download a Windows 7 ISO? When we buy a copy of Windows 7, we don't get a special installation DVD. Every DVD of a particular version - e.g. Windows 7 Home Premium x864 or Windows 7 Professional x64 - is identical to all the others. What we buy is the unique 25-character product key. We will find it as a sticker on the retail Windows 7 DVD case. Or, with pre-installed Windows, stuck underneath our laptop and on the side of the PC tower. With this product key, we can install Windows 7 using any disk of the corresponding version. No matter where we got the Installation DVD, we will end up with legally activated Windows 7 on our PC. We can even download Windows 7 as an ISO from the shadiest torrent site. As long as we are using our genuine product key, the Windows installation will be 100% legal. Where can I find the Windows 7 PC didn't have Windows preinstalled and doesn't have a sticker, we can use special applications to get the Windows 7 product key. Some apps will even work in cases where we can't boot into Windows, as long as the hard drive is functional. Just check out our guide on how to find the Windows product key. Microsoft giveth, Microsoft taketh away Even though it would work, downloading Windows 7 from questionable sources is never a good idea. For all we know, the ISO could contain a host of malware: rootkits, trojans, keyloggers; you name it. That's why it was a big deal that Microsoft allowed us to download Windows 7 as an ISO through Digital River. We could download Windows 7 and be sure that the ISO was clean and untampered. And then, in early February 2015, Microsoft decided to take down the Digital River ISOs, for good. Sure, they have set up the Microsoft Software Recovery website, the "official" way to download Windows 7. However, to download Windows 7 through this site, we need the product key of a store-bought, retail version of Windows. In case we have a desktop or laptop computer with pre-installed Windows, we own an OEM Windows 7 License. And Microsoft's website, for reasons unknown, won't let us download Windows 7 ISOs with a valid OEM product key. So, as OEM owners, what are we supposed to do? Steal a disk? Beg friends and strangers for a Windows 7 DVD? According to Microsoft, we should order a physical replacement disk, wait a couple of weeks for the delivery, and pay the shipping and handling fees. Not exactly an ideal solution. The clean ways to download a Windows 7 ISO The good news is that whatever goes up on the Internet, never really goes away - for better or for worse. The German mirror �has done an exceptional job gathering the Digital River ISOs and uploading them as torrent files. They have all the different English versions and even a few in other languages. Download Windows 7 Torrent To download Windows 7 using a torrent file, we will need a torrent client. In the example, we will be using the popular torrent client qBittorrent. Any torrent client will work, though, such as uTorrent / µTorrent or BitComet. So, if you already have a torrent client, you don't need to install qBittorrent. With a torrent client installed, we only need to download our preferred version's torrent file: The torrent file is just a few kilobytes in size, and it will download immediately. Please note that the MD5 Checksums and SHA-1 Hashes refer to the Windows 7 ISO, not the torrent file. How to use the torrent file With a correctly installed Torrent client, we just need to double-click on the torrent file, which will start the application and will ask us where to download the ISO file. Depending on our internet speed, and the available seeders, the ISO file should download in a few minutes. How can I trust that the Windows 7 ISO is clean? As we mentioned earlier, downloading Windows 7 from questionable sources is never a good idea. So, since a random German mirror site isn't exactly a reputable source, how can we be 100% confident that these ISOs are clean and safe? Fortunately, Microsoft can help with that. You see, these ISOs are the same ISOs we could download if we had an MSDN subscription. And Microsoft provides the SHA-1 checksum for the ISOs downloaded by MSDN subscribers. We just need to visit this page, where we will find the relevant information for all the Windows 7 ISOs. We just need to look for the version we downloaded using the torrent file, and click on "Details". For the example, we will be using Windows 7 Home Premium with Service Pack 1 (x64). - Ignore the Product Keys and Download buttons; they won't work without a 1000$+ MSDN subscription - We know that we have the correct version from the ISO filename. To confirm that the ISO we downloaded is 100% clean, we just need to compare Microsoft's SHA-1 checksum with the ISO file's checksum. For this, we will use the free MD5 & SHA Checksum Utility. This app requires the .NET Framework 3.5, and Windows will prompt to install it if we don't have it already. Apart from the .NET framework, the app is portable, and it doesn't require an installation. We just run it, click on browse, and select the Windows 7 ISO. Make sure to select the Windows 7 ISO and not the torrent you used to download the ISO. Depending on our CPU speed, calculating the checksums will take a couple of minutes. On the MSDN page, we select the SHA1 checksum and copy it. We paste it on the Verify Hash with Generated Hash field on the app and click on Verify. The "SHA-1 Hash matched" message means that these Windows 7 ISOs are 100% identical to Microsoft's ISOs, and not a single byte is different. How to download Windows 7 straight from Microsoft Torrents are excellent ways to download large files, but they are not for everyone. If you don't have a torrent client and are not keen on installing one, there is an alternative way to download Windows 7 straight from Microsoft. What's best, this way will allow us not only to download Windows 7, but also Windows 8.1, Windows 10, and several versions of Microsoft Office. Firstly, we need to download the latest version of the Windows ISO Downloader from Heidoc.net. As of this writing, the version is 4.36, updated on May 12th, 2017. The app is about 1MB and it will download instantly. VirusTotal gives the app a 100% clean bill of health. But feel free to test the latest version yourselves on VirusTotal.com or with the antivirus app you use on your PC. The Windows ISO Downloader is a portable app, that does not require an installation. We just open the app, and we are good to go. The app is particularly easy to use, even for completely novice users. Firstly, we select the version of Windows or Office on the upper right-hand corner... Then, from the main window, we select the edition that matches our product key. For most users with preinstalled Windows, the correct version is Windows 7 Home Premium SP1 COEM, or Windows 7 Professional SP1 COEM. After we hit the "Confirm" button, we get to choose the Windows 7 language. Our product key will work on any language available. Once we confirm the language, we get the option of downloading either the 32-bit or the 64-bit version of Windows. These buttons and the subsequent links will only work for 24 hours from the time of creation. You should note that the download happens straight from Microsoft's servers. On a fast ADSL or VDSL connection, the download will take approximately 20 minutes. If we want to use a different browser or a download accelerator, we can get the download links from the "Copy link" buttons on the right. We can then paste the link to the browser or app of our choice.
